Email

Details of Complaint: Concerns about this facility being unclean and unsafe. Including animal rooms being unclean, cages that are too small for capybara, and pictures of people feeding large cats raw meet and posing with these animals outside their enclosures.

Results: On July 13 an investigation into the above complaint was conducted. The facility was found to be clean and safe. All animal enclosures met USDA regulations for space. A photo of a person feeding a large cat was taken many years ago and they no longer allow anyone back with the large cats. The information in this complaint was unfounded.
