14304 COUNTY ROAD 22

RIVER BEND KENNELS

Type: ROUTINE INSPECTION

GOSHEN, IN 46528

Date: Aug-05-2010

3.11 (a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Sec. 3.11 Cleaning, sanitization, housekeeping, and pest control.

(a) Cleaning of primary enclosures. Excreta and food waste must be removed from primary enclosures daily, and from under primary enclosures as often as necessary to prevent an excessive accumulation of feces and food waste, to prevent soiling of the dogs or cats contained in the primary enclosures, and to reduce disease hazards, insects, pests and odors.

There were multiple piles of dried feces in the middle outdoor enclosure housing two beagles. The feces can attract pests and vermin which carry disease that can sicken the dogs.

The primary enclosures, for all dogs, need to be cleaned daily to remove feces and food waste. This will prevent the attraction of pests and vermin in the animal's enclosure.

Cleaning should be done daily.

Corrected at the time of inspection.

The program of veterinary care is currently under review by the USDA Regional Office to determine compliance with the Animal Welfare Act.

No regulated activity may be conducted from this location until the review is complete and the site is approved by the Department.

Inspection and exit interview conducted with owner and Lori Linn.
