Email

**Details of Complaint:** Primates not in cages but rather tied to the floor with chains; marmosets have bitten children. Also known for shooting dogs and cats instead of taking them to the vet for care.

**Results:** Dr. Jamilon Niemann and I responded to this address in June 2010 for a complaint of abuse and neglect on primates at this residence. No regulated activity was being conducted.

This complaint does not fall within the realm of regulated activity of the AWA and is outside of my jurisdiction.

At approximately 6 pm this evening, I spoke with a Deputy of the Texas County Sheriff's Department in Houston, MO. He stated that he had responded to this address numerous times for animal abuse complaints. I explained the situations that lie within our jurisdiction and why this complaint does not.

He stated that he would respond to the address again and fulfill the complaint requirements.

Therefore, this complaint was turned over to the local authorities. Please close this complaint.
