

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Keep away from humans, domestic animals and pets. Wear protective gloves when handling. If pregnant, do not handle or administer product. Accidental injection may cause infertility in women. Wash all implements used for handling or applying product with detergent and water. Do not use these implements for mixing, holding, or transferring food or feed.

ENVIRONMENTAL HAZARDS

Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear:

- long sleeved shirt and long pants
- gloves
- shoes plus socks

USE RESTRICTIONS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. A copy of this label must be in the possession of the user at the time that the product is applied.

READ THIS LABEL: Read this entire label and follow all use directions and precautions.

IMPORTANT: Do not expose children, pets, or other non-target animals to this product. To help prevent accidents

- 1) Keep children out of areas where this product is used.
- 2) Store product not in use in a location out of reach of children and pets.
- 3) Apply product only according to the directions authorized.
- 4) Dispose of product container and spoiled or unused product as specified in the "STORAGE AND DISPOSAL" section on this label.

UNITED STATES DEPARTMENT OF AGRICULTURE
ANIMAL AND PLANT HEALTH INSPECTION SERVICE
Riverdale, MD 20737-1237
EPA Est. No. 56228-ID-1
EUP. No. 56228-EUP-xx
Net Contents: 2 milliliters (0.066 fl. ounce)

DIRECTIONS FOR USE

GonaCon™ renders a vaccinated female feral horse 2 years of age or older infertile for a minimum of one year following vaccination.

GonaCon™ should not affect existing pregnancy, but should cause infertility of the vaccinated animal the subsequent year and possibly longer.

Administer a single vaccination (2 ml) of GonaCon™ at least two to three months prior to the onset of breeding for full contraceptive effect.

The effects of the vaccine may wear off the second year or sometimes longer, vaccinated females may once again become fertile and capable of breeding.

GonaCon™ must be administered by hand injection. Inject each female with 2.0 ml of GonaCon™, using an appropriately sized stainless steel hypodermic needle, by intramuscular injection into a large muscle mass.

Syringes must be individually labeled with the following language:

CAUTION, Restricted Use: Injection Hazards
KEEP OUT OF REACH OF CHILDREN
GonaCon Immunocontraceptive Vaccine
Active Ingredient: Gonadotropin Releasing Hormone (0.03%)
See Full Product Label for Application Instructions.
