Wood Packaging Material

Last Modified:

Wood packaging material (WPM) used to support, protect, or carry cargo into the United States must be treated and certified per International Standards for Phytosanitary Measures No. 15 (ISPM 15). We use the same standard for exports to ensure WPM meets importing countries' requirements. These standards help prevent the spread of harmful, wood-boring pests and facilitate safe international trade.

This page offers guidance and resources for meeting these standards.

[Import WPM into the United States](#)

As a U.S. importer or broker, find out what's regulated as WPM, how to source ISPM 15-compliant WPM, and what to do if you receive an Emergency Action Notification. This page also includes training videos and other resources for WPM manufacturers.

[Export WPM to Another Country](#)

As a U.S. exporter or warehouse, find information on ISPM 15 standards, accreditation, and which countries require WPM to be compliant.
