Purpose
This map is to assist laboratories receiving domestic origin soil samples for chemical/physical analysis from areas where soil is regulated by USDA.

Contact USDA APHIS PPQ for all other movements or purposes.

Regulated Pests
Pink, Blue, and Yellow areas of this map are regulated by USDA to prevent the spread of:
- Various Fruit Flies
- Golden Nematode
- Imported Fire Ant
- Pale Cyst Nematode
- Phytophthora ramorum
- Witchweed

(Click on the pest name to learn more about it and find detailed quarantine maps)

Authorized Movements
Soil samples from Pink and Blue areas may be moved into or through the White areas to a USDA approved facility under a soil compliance agreement. Movement of soil from locations within the Yellow areas may require a Limited Permit (PPQ 530) or Certificate (PPQ 540).

Click here for the most up-to-date version of this map

Additional Restrictions
Movement of soil for isolation or culturing of organisms requires a Plant Pest Permit (PPQ 526). Importation of soil from outside the continental U.S. requires a USDA import permit (PPQ 525).

Individual states may have additional restrictions on the movement of soil. Consult with destination states prior to movement.

Contact USDA APHIS PPQ for questions about quarantine status, soil regulations, or movement eligibility.
