

How to Purchase Ergonomic Equipment

Equipment recommendations may be provided as part of an ergonomic evaluation or as needed. Please view the list of [Approved Equipment](#) to find various options and ordering information to meet your ergonomic needs.

* GSA pricing is available on most items upon request.

** It is important to try and demo equipment prior to purchase to determine if equipment meets needs, comfort, and or support, where applicable. If the manufacturer does not offer a trial period, try and go to a local store to trial the equipment. The APHIS Ergonomics Program may also be contacted for possible equipment trials.
