

AMS Shorthand Code Naming Structure

Below details the AMS naming structure which should be used when creating Shorthand Codes (SHC) for the Financial Management Modernization Initiative (FMMI) system.

FMMI Master Data Element	Positions Taken for SHC	Full String (Blue is what is extracted)
FMMI Budget Period	Character positions 1 to 4. Includes all 4 characters of the FMMI Budget Period.	11XX (No Year) 1111 (Annual) 4 Characters
FMMI Fund	Character positions 5 to 10. The last 6 characters of the FMMI Fund.	AM00 5209S4 6 Characters
FMMI Functional Area	Character positions 19-20. The 5 th and 6 th character positions of the FMMI Functional Area.	AM00 85 0000000000 2 Characters
FMMI Cost Center	Character positions 11-18. The last 8 characters of the FMMI Cost Center.	AM DYDC2200 8 Characters
FMMI Work Breakdown Structure (WBS Element)	Character positions 21- 2. The last 7 characters of the FMMI WBS Element.	AM.A U.DY01.CH 7 Characters (Excluding periods)

Explanatory Notes:

- ✓ Not all SHC will have an associated WBS element.
 - Codes without a WBS will need a 7 digit filler.
 - *ZZZZZZZ*
 - By default if you have a WBS you have a WBS level 2, because spending can only occur at a level 2.

- ✓ There is a maximum of 27 character positions available. AMS is using all available digits.

AMS Shorthand Code Naming Structure

Shorthand Code Format:

FMMI Budget Period (4) + FMMI Fund (6) + FMMI Functional Area (2) + FMMI Cost Center (8) + FMMI WBS Element + (7)

Example:

AMS FMMI SHORTHAND CODE STRUCTURE

SHORTHAND CODE	08XX5209S485DYDC2200UDY01CH
-----------------------	------------------------------------

SC FORMAT	BFY	Fund	Functional Area	Cost Center	WBS Element
Data Example	0 8 X X	5 2 0 9 S 4	8 5	D Y D C 2 2 0 0	U D Y 0 1 C H
Position	1 2 3 4	5 6 7 8 9 10	11 12	13 14 15 16 17 18 19 20	21 22 23 24 25 26 27

FMMI DATA ELEMENTS	FMMI Budget Period	FMMI Fund	FMMI Functional Area	FMMI Cost Center	FMMI WBS Element
	08XX	AM005209S4	AM00850000000000	AMDYDC2200	AM.AU.DY01.CH
