:30 RADIO “ASIAN LONGHORNED BEETLE PSA”

ANNCR:

Since the day the Asian longhorned beetle appeared, thousands of our nation’s hardwood trees have been lost. Once this pest infests a tree, there is no cure. What you *can* do is look for and report it before it has the chance to destroy more trees. So take 10 minutes to check your trees for the beetle, and any sign of the damage it causes, especially in August, when the beetle is most likely to be seen. Then, report any sightings at AsianLonghornedBeetle.com. The best line of defense against this devastating pest is *you*.
