**Certification Statements:**

1. The animal(s) were born in and have never left the United States, OR where not born in or have left the United States and returned, and have been in the United States for the previous six (6) months.
2. The animal(s) have been implanted with an I.S.O. microchip, prior to receiving a rabies vaccination with an inactivated adjuvant vaccine. The animal(s) were not less than twelve (12) weeks of age at the time of vaccination.
3. At least three (3) weeks following the rabies vaccination, a blood sample was taken from the animal(s) following microchip verification, and tested for antibody level via FAVN test at an approved laboratory\*. *(Once the animal has a protective antibody level (>0.5 IU/ml) as established by the approved laboratory, the animal can be exported to St. Vincent and the Grenadines. A copy of the Laboratory result must be delivered to the office BEFORE an import permit will be issued. No import permit will be issued until the results have been received at this office and the protective antibody level is confirmed.)*
4. Upon inspection, the animal(s) were found to be in in good health and free from symptoms of any notifiable or any other infectious or contagious disease.
5. **Dogs only:** The animal(s) have been vaccinated against Canine Distemper, Parvovirus, Leptospirosis, Hepatitis and Parainfluenza not less than seven (7) days prior to date of export.
6. **Cats only:** The animal(s) have been vaccinated against Feline Rhinotracheitis, Panleukopenia, Feline Leukemia, Calicivirus and Chlamydomphila psittaci
7. **Dogs only:** The animal(s) were tested for heartworm disease with negative results within seven (7) days prior to date of export.
8. The animal(s) were treated for external parasites and for internal parasites with an approved broad spectrum anthelmintic within seven (7) days prior to date of export.

\*\*\*\*\*
