Certification Statements:

- The United States is free from high pathogenic avian influenza and Newcastle disease in poultry as defined by the World Organization for Animal Health (OIE) (except for California and South Carolina).
- The animals shall have been kept, for three months prior to export or since hatching, in an enclosure regularly inspected by a USDA-accredited veterinarian who is responsible for disease diagnosis and notification.
- The disease listed below shall not have been confirmed in the animal enclosure for the below time periods: for one year without Newcastle disease, pullorum disease, fowl cholera, or avian tuberculosis; and for six months without H5 and H7 subtype avian influenza, avian chlamydiosis, avian mycoplasmosis cause by *Mycoplasma gallisepticum*, infectious coryza.
- The animals were detained for a 21-day quarantine in a USDA-accredited veterinarian approved facility that does not allow free entry of mosquitos and is supervised by a USDA accredited veterinarian:
 Quarantine Start Date: _____ The quarantine end date is the date of shipment/departure.
 - The animals were considered healthy and free from any disease symptom during quarantine.
- The animals were subject to the following tests during quarantine. **All test results were negative and performed at an approved laboratory.** [For consignments of greater than 20 birds, no more than 20 birds need be tested. In such cases, the number of birds actually tested should be specified.]

Animal ID Number	Laboratory Name	H5 avian influenza sample and test date(s)	H5 avian influenza test type (antibody test or causal agent identification)	H7 influenza sample and test date(s)	H7 avian influenza test type (antibody test or causal agent identification)

Use an additional page for testing results, if needed.

- The animals are not vaccinated against avian influenza.
 - Name and date of any other vaccines: _____
- During the pre-export quarantine all birds in the Family Psittacidae were administered (a) chlortetracycline; (b) doxycycline; or (c) a medication deemed, by USDA, of equivalent efficacy in treating or preventing avian chlamydiosis.
- The export consignment shall be prevented from contacting other poultry and birds as it is transported from the animal enclosure to the importing country.
