Subject: APHIS Establishes a Domestic Quarantine for Citrus Canker (*Xanthomonas citri* subsp. *citri*) in Baldwin County, Alabama

To: State and Territory Agricultural Regulatory Officials

Effective immediately, the Animal and Plant Health Inspection Service (APHIS) and the Alabama Department of Agriculture and Industries (ADAI) are establishing a quarantine for citrus canker for all of Baldwin County, Alabama, to prevent the spread of the disease.

On June 22, 2021, APHIS confirmed the positive identification of citrus canker from two citrus trees located on a residential property in Baldwin County, Alabama. By November 4, ADAI detected citrus canker in a total of 12 citrus trees within residential and commercial citrus. On February 9, 2022, ADAI established an intrastate quarantine for citrus canker that parallels the federal citrus canker regulatory requirements specified in 7 Code of Federal Regulations (CFR) § 301.75.

Under the current citrus canker quarantine regulations, the interstate movement of citrus plants and plant parts, other than commercially packed and disinfected citrus fruit remains prohibited. Citrus nursery stock that is moved in accordance with regulations contained in 7 CFR § 301.75-6 may move from areas quarantined for citrus canker.

The establishment of this quarantine area is reflected on the following designated website, which also contains a description of all the current federal citrus canker quarantine areas:

<http://www.aphis.usda.gov/plant-health/citrus-canker>

**Federal Order**

**7 CFR § 301.75-4 Quarantined Areas; Citrus Canker**

DA-2022-26  
July 25, 2022

Effective immediately, this Federal Order establishes a quarantine for citrus canker in Baldwin County, Alabama, to prevent the spread of this plant disease caused by *Xanthomonas citri* subsp. *citri*.<sup>1</sup> This action is in response to the detection of citrus canker during routine surveys in Baldwin County, Alabama. APHIS has determined that this area in Alabama meets the criteria in § 301.75-4 (b) of the regulation to be designated as a quarantined area.

This Federal Order is issued in accordance with the regulatory authority provided by the Plant Protection Act of June 20, 2000, as amended, Section 412(a), 7 U.S.C. 7712(a). The Act authorizes the Secretary of Agriculture to prohibit or restrict the movement in interstate commerce of any plant, plant part, or article, if the Secretary determines the prohibition or restriction is necessary to prevent the dissemination of a plant pest within the United States. The regulatory authority provided by 7 U.S.C. 7754 allows the Secretary to issue orders to carry out this provision of the Plant Protection Act. This Federal Order is likewise issued pursuant to the regulations promulgated under the Plant Protection Act found at 7 CFR § 301.75 *et. seq.*

This Federal Order establishes a quarantine area for citrus canker in Alabama and supersedes the Federal Order DA-2022-03 issued on February 2, 2022.

**Addition of Quarantined Area**

To prevent the spread of citrus canker, the Administrator of the Animal and Plant Health Inspection Service (APHIS) finds it necessary to regulate Baldwin County in Alabama. Accordingly, and effective immediately, all interstate movement of regulated articles from these areas must be done in accordance with the regulations promulgated in the Plant Protection Act found at 7 CFR § 301.75 *et seq.*, and any applicable provisions of this Federal Order.

---

<sup>1</sup> Citrus canker is caused by *Xanthomonas citri* subsp. *citri*. The taxonomy of this pathogen has changed and includes the following designations (1) *Xanthomonas axonopodis* pv. *citri* (Xac A, A\* and A<sup>W</sup>) with synonyms *X. citri* pv. *citri*, or *X. campestris* pv. *citri*, or *X. smithii* subsp. *citri* and (2) *X. axonopodis* pv. *aurantifolii* (Xac B & C) with a synonym *X. fuscans* subsp. *aurantifolii*.

The establishment of this quarantine area is reflected on the following designated website, which also contains a description of all the current federal citrus canker quarantine areas:

<http://www.aphis.usda.gov/plant-health/citrus-canker>

Section 7 CFR § 301.75-4 (b) provides for the temporary designation of new regulated areas pending publication of a rule to add the new areas to the list shown in 7 CFR § 301.75-4 (a).

7 CFR § 301.75-4 (b) further requires written notification be given to the owner or person in possession of a newly quarantined area. This is the responsibility of the federal and/or state regulatory personnel responsible for the citrus canker program in the affected state.

7 CFR § 301.75-4 (c) provides for the removal of a quarantine pending sufficient evidence that demonstrates the area has been free from infestation for a period of two years from the initial detection.

Section 7 CFR § 301.75-4 (d) allows the designation of less than an entire state as a citrus canker regulated area only when the Administrator of APHIS has determined, as in this case, that the designation of less than an entire state is adequate to prevent the interstate spread of infestations of citrus canker. In addition, 7 CFR § 301.75-4 (d) (2) requires that the state enforce an intrastate citrus canker quarantine that is equivalent to the federal citrus canker regulations. The State Plant Regulatory Official for Alabama has confirmed the establishment of an intrastate quarantine area for citrus canker that mirrors the federal regulatory requirements as specified in 7 CFR § 301.75.

For additional information regarding the citrus canker program, you may contact Shailaja Rabindran, Director of Specialty Crops and Cotton Pests at (301) 851-2167.

We continue to appreciate the cooperative relationship with state regulatory officials and the citrus industry in Alabama, in our efforts to prevent the spread of citrus canker.

### **Quarantined Boundaries**
