

Grape*

Pest: *Lobesia botrana* (vine moth)

Treatment: MB at NAP— chamber

Temperature	Dosage Rate (lb/1000 ft ³)	Minimum Concentration Readings (ounces) At:	
		0.5 hr	3 hrs
50 °F or above	3.5 lbs	50	40

*USDA certified chamber required for treatment.

**Commodity load is not to exceed 50%.

***Readings are not required for USDA certified chambers, but readings should be taken initially to determine sorption for commodity and new packaging configurations.

****The USDA does not accept responsibility for any damages caused by the fumigation. The owner must assume responsibility for all damages to the commodity.

*****The USDA may change this treatment AT ANY TIME.

*****When choosing a methyl bromide formulation, make sure the product label allows for a 3 hour exposure time; not all methyl bromide labels allow a 3 hour exposure time for grapes.
