

FOR INFORMATION AND ACTION

DA-2021-15

June 17, 2021

Subject: Expansion of Quarantine Areas for the Imported Fire Ant (*Solenopsis invicta* Buren, *S. richteri* Forel, and hybrids of these species) in Arkansas, North Carolina, Oklahoma, and Virginia

To: State and Territory Agricultural Regulatory Officials

Effective immediately, the Animal and Plant Health Inspection Service (APHIS) is issuing a Federal Order that expands the existing imported fire ant (IFA) quarantine areas in Arkansas, North Carolina, Oklahoma, and Virginia. APHIS is taking this action to prevent the interstate spread of IFA.

The following list describes the action in this Federal Order:

- Arkansas: Extends the IFA quarantine area to the entire county for Logan, Prairie, Sebastian, and White Counties.
- North Carolina: Extends the IFA quarantine area to the entire county for Davidson, Orange, and Vance Counties.
- Oklahoma: Extends the IFA quarantine area to the entire county for Pittsburg County.
- Virginia: Extends the IFA quarantine area to the entire county for Brunswick, Greensville, Isle of Wight, Mecklenburg, and Southampton Counties and the cities of Emporia and Franklin.

APHIS is taking these actions based upon verification from the Arkansas Department of Agriculture; the North Carolina Department of Agriculture and Consumer Services; the State of Oklahoma Department of Agriculture, Food, and Forestry; and the Commonwealth of Virginia Department of Agriculture and Consumer Services that IFA is present and established in the areas listed.

For additional information on the IFA quarantine area, please contact the IFA National Policy Manager, Herbert Bolton, at 301-851-3594.

***Domestic Quarantine of Multiple Counties in Arkansas, North Carolina, Oklahoma, and  
Virginia for Imported Fire Ant  
(*Solenopsis invicta* Buren, *Solenopsis richteri* Forel and hybrids of these species)***

DA-2021-15

June 17, 2021

This Federal Order expands the existing imported fire ant (IFA) quarantine areas in Arkansas, North Carolina, Oklahoma, and Virginia.

This Federal Order is issued pursuant to the regulatory authority provided by the Plant Protection Act of June 20, 2000, as amended, Section 412 (a), 7 U.S.C. 7712 (a). The Act authorizes the Secretary of Agriculture to prohibit or restrict the movement in interstate commerce of any plant, plant part, or article if the Secretary determines the prohibition or restriction is necessary to prevent the dissemination of a plant pest within the United States. This Federal Order is likewise issued pursuant to the regulations promulgated under the Plant Protection Act found at 7 CFR 301.81.

Effective immediately, the Animal and Plant Health Inspection Service (APHIS) is including the following to the quarantine areas in the respective states for red and black IFA (*S. invicta* Buren and *S. richteri* Forel, respectively), and hybrids of these species:

- Arkansas - the entire county for Logan, Prairie, Sebastian, and White Counties;
- North Carolina - the entire county for Davidson, Orange, and Vance Counties;
- Oklahoma - the entire county for Pittsburg County; and,
- Virginia - the entire county for Brunswick, Greensville, Isle of Wight, Mecklenburg, and Southampton Counties, and the cities of Emporia and Franklin.

This action is in response to the new detections in portions of the states of Arkansas, North Carolina, Oklahoma, and Virginia described in the attached document. APHIS finds it is necessary to quarantine these areas in order to prevent the spread of IFA. Effective immediately, all interstate movement of IFA regulated articles from the listed areas must be done in accordance with the regulations promulgated pursuant to the Plant Protection Act and found at 7 CFR 301.81 et seq. and in the Federal Orders which are located at the following APHIS website:

[https://www.aphis.usda.gov/aphis/ourfocus/planthealth/plant-pest-and-disease-programs/pests-and-diseases/imported-fire-ants/ct\\_regulations](https://www.aphis.usda.gov/aphis/ourfocus/planthealth/plant-pest-and-disease-programs/pests-and-diseases/imported-fire-ants/ct_regulations)

Section 7 CFR 301.81-3(a) allows the designation of less than an entire State as an IFA quarantined area only when APHIS has determined that the designation of less than an entire State as a quarantined IFA area is adequate to prevent the interstate spread of infestations of this pest. In addition, 7 CFR 301.81-3(b) requires that the State enforces an intrastate IFA quarantine that is equivalent to the Federal IFA regulations. The States have established intrastate quarantines for the areas listed that mirror the Federal regulatory requirements as specified in 7 CFR 301.81.

Previous Federal Orders pertaining to the expansion of quarantined areas in the IFA regulations have been necessary due to the ongoing delimitation of the IFA infestation in various states. This Federal Order further expands the quarantined areas as described in the IFA domestic regulations.

For additional information on the IFA quarantine areas, please contact the IFA, National Policy Manager, Herbert Bolton, at 301-851-3594.

We appreciate the cooperative relationships with the affected states in our effort to prevent the spread of IFA.
