

**Basis for changes to the Pale Cyst Nematode (PCN) Regulated Area  
January 10, 2014**

Since the last update to the PCN Regulated Area on December 6, 2013, approximately 2,297 acres of farmland have been deregulated from PCN regulation.

Approximately 2,297 acres of farmland were deregulated after completing a release protocol comprised of a sequence of surveys with negative laboratory results for PCN in accordance with the Federal PCN Final Rule, subpart 301.86-3(d)(2) *Removal of fields from quarantine – Associated fields*. The locations of the deregulated fields are as follows: Bingham County - T01N, R36E, sections 16, 17, 18, 35, and 36; T01S, R35E, sections 13, 25, and 33; T01S, R36E, sections 18 and 30; T02S, R35E, section 1; T02S, R36E, section 20; Bonneville County – T01N, R36E, section 8; T01N, R37E, section 1; T02N, R37E, section 36.

These changes bring the current regulated area to 8,478 acres, of which 2,300 acres are infested.
