

**Basis for changes to the Pale Cyst Nematode (PCN) Regulated Area  
March 12, 2018**

The following change has been made to the PCN regulated area since the December 15, 2017 publication:

A 222-acre field has been released from regulation under the Federal PCN Final Rule (effective April 29, 2009). The location of the field, deregulated after completing a release protocol comprised of a sequence of surveys with negative laboratory results for PCN, and in accordance with the Federal PCN Final Rule subpart 301.86-3(d)(2) *Removal of fields from quarantine – Associated fields*, is as follows: Bingham County – T 02 S, R 37 E, Section 17.

With this change, the current regulated area is 8,220 acres, of which 3,043 acres are infested fields.
