

**Basis for changes to the Pale Cyst Nematode (PCN) Regulated Area
November 4, 2011**

The following changes have been made to the PCN regulated area since the September 23, 2011 publication:

In accordance with the PCN Rule, subpart 301.86-3(c)(2)(iii) *Criteria for designation of fields as infested fields and associated fields - Associated fields*, 138.2 acres of farmland have been added to the regulated area due to their primary association with the 12th infested field (announced in the Sep. 23rd, 2011 publication), and 29.7 acres have been removed from the regulated area as a result of a mapping boundary correction.

Together, these changes bring the current total regulated area to 15,641 acres, of which 1,467 acres are infested fields.
