Cervid Health Program

Last Modified:

APHIS monitors and manages infectious disease of farmed cervids (such as deer, elk, and moose). We also regulate the movement of wild cervids in interstate commerce and promote biosecurity and emergency preparedness to protect animal and public health as well as international trade.

Farmed Cervid Diseases

Chronic Wasting Disease

Chronic wasting disease (CWD) is a deadly, neurological illness that affects deer, elk, moose, and other members of the Cervidae family.

Bovine Tuberculosis

Bovine tuberculosis is a rare, bacterial disease that can affect deer, cattle, goats, dogs, humans, and other mammals.

Brucellosis

Brucellosis (also known as contagious abortion or Bang's disease) is a costly disease of livestock and wildlife.

Disease Prevention and Management

Voluntary Herd Certification Program

The CWD Herd Certification Program is a cooperative effort between APHIS, State animal health and wildlife agencies, and farmed cervid owners.

Emergency Preparedness and Biosecurity

Both natural and manmade disasters can affect farmed cervids. The best way to protect your herd is through emergency planning.

Interstate Movement of Wild-Caught Cervids

Moving wild-caught cervids across State lines is prohibited unless Federal requirements are met.

NAHMS Cervid Studies

NAHMS conducted a study in 2014 on health and management practices on U.S. farmed cervid operations.

CWD Management and Response Funding Opportunities

APHIS provides millions of dollars each year to State and Tribal governments, universities, and others to control CWD in wild and farmed cervids, such as deer and

Disease Surveillance and Research in Wild Cervids

APHIS Wildlife Services conducts surveillance and research on dozens of wildlife diseases, including [CWD](#), [bovine tuberculosis](#), and [SARS-CoV-2](#). For more information, visit our [National Wildlife Disease Program](#) and [National Wildlife Research Center](#). APHIS and other One Health partners are also conducting [projects and studies](#) to protect our Nation's animals and people from SARS-CoV-2 and other zoonotic diseases.
