Export Live Animals to Greece

Last Modified:

Electronic Signature ACCEPTED; Original Ink Endorsement REQUIRED

For Accredited Veterinarians: Electronic signature ACCEPTED

For APHIS VMO: Original ink endorsement REQUIRED

USDA-accredited veterinarians can electronically issue health certificates and use VEHCS (Veterinary Export Health Certification System) to submit them to USDA for endorsement.

USDA must ink-sign and emboss the health certificate.

What This Means for You

Accredited Veterinarians: Use the links below to access or get help with VEHCS. Learn more about how to issue export health certificates.

Animal Owners/Shippers: You can arrange to have your health certificate returned by mail (a prepaid, preaddressed return label must be provided during certificate submission). The endorsed health certificate—ink-signed and embossed—must accompany the animal(s) during shipment or travel.

Summary of Requirements

This country is a Member State of the European Union (EU). Bilingual health certificates are available for some commodities/species (see below). If the bilingual certificate for that species or commodity is not listed below, please refer to the English version on the EU IRegs webpage. It is the responsibility of the exporter to obtain a bilingual certificate if it is not listed below.

The European Union (EU) has updated all of their harmonized health certificates in accordance with their Animal Health Law. The new export health certificates are posted on the EU IRegs. Regularly check the EU IRegs for the most up-to-date information regarding live animal exports to the EU.

It is the responsibility of the exporter to obtain a bilingual certificate if it is not available on the relevant Member State IRegs page. If you need to create a bilingual version of a harmonized EU certificate, please contact LAIE@usda.gov with your request, and we will provide you the necessary documents.

Note: Some health certificates may have had non-relevant statements removed (rather than lined out) as allowed in EU legislation, which is strictly to simplify/shorten the documents.

Expand All

Aquaculture/Aquatic Animals

- AQUA - ENTRY - ESTAB/RELEASE/OTHER (408.9 KB)- Health certificate for the entry into the Union of aquatic animals intended for certain aquaculture establishments, for release into the wild, or for other purposes, excluding direct human consumption - September 2021

- stocks of *in vitro* produced embryos of bovine animals produced, processed and stored in accordance with Directive 89/556/EEC before 21 April 2021, conceived using semen coming from semen collection or storage centres approved by the competent authority of the exporting country.

Other Animals

- Live Annelids - Health Certificate (22.37 KB) - August 2015
  Note: Greece expects the certificate to be typed (not handwritten) and to be issued within 10 days of arrival at the point of entry. Shipments will be rejected if these conditions are not met.

Taking a Pet to Another Country?

Visit Pet Travel

If your species is not listed, the requirements for that species are not known. Exporters who want to ship livestock or germplasm whose requirements are not listed above should have the importer or buyer in the destination country apply for an import permit at the appropriate ministry. This import permit will most likely outline the specific requirements.

Need Help?

USDA-Accredited Veterinarians

Contact a USDA-accredited veterinarian for questions about your destination country's entry requirements for animals (including any needed vaccinations, tests, or treatments); issuance of health certificates; and status updates on certificate endorsement.
