Export Live Animals to Philippines

Last Modified:

Green Banner Country

For Accredited Veterinarians: Electronic signature ACCEPTED

For APHIS VMO: Digital endorsement ACCEPTED

Save Time and Money With VEHCS!

USDA-accredited veterinarians can submit health certificates for electronic signature through VEHCS (Veterinary Export Health Certification System).

[Learn More](#)

Accredited Veterinarians can submit health certificates for USDA endorsement electronically through VEHCS (Veterinary Export Health Certification System).

This country **accepts USDA digital endorsement**. This means the final, endorsed health certificate that travels with the animal(s) can be printed out directly from

VEHCS and does NOT have to be mailed back to you.

Live Animal Export Country Requirements

[View Requirements](#)

Summary of Requirements

Equine

- [Equine - Health Certificate](#) - March 2009

Cattle

- [Cattle - Health Requirements](#) - February 2014
- [Bovine - Semen - Health Certificate](#) - November 2009
- [Bovine - Embryos - Protocol](#) - May 2020
- [Bovine - Embryos - Sample Health Certificate*](#) - May 2020

***Note:** Philippines does not require a certain format for the health certificate.

Sheep and Goats

- [Sheep and Goats - Protocol](#) - February 2014
- [Sheep and Goats - Semen - Health Certificate](#) - October 2021

Swine

- [Swine - Health Certificate](#) - December 2011
- [Swine - Semen - Health Certificate](#) - December 2011

Poultry

- [Birds - Pet, Exhibition, Day-old Chicks, and Hatching Eggs - Health Certificate](#) - February 2019

Note: Shipments of adult birds, including game fowl, **must** have proper identification on each bird that is consistent with the identification on the health

certificate. Additionally, if an import permit is issued/presented with different requirements, it may be used to create an alternative health certificate to meet those stated requirements.

Note: Philippines is currently not allowing imports of poultry or birds from California, Ohio, or South Dakota.

Birds (non-Poultry)

- [Birds - Pet, Exhibition, Day-old Chicks, and Hatching Eggs - Health Certificate](#) - February 2019

Note: Shipments of adult birds, including game fowl, **must** have proper identification on each bird that is consistent with the identification on the health certificate. Additionally, if an import permit is issued/presented with different requirements, it may be used to create an alternative health certificate to meet those stated requirements.

Other Animals

- Commercial Pet Dogs and Cats - March 2021
 - [Philippines Requirements Memo](#) - March 2021 - A summary of the requirements are as follows:
 - Commercial U.S. exporters of dogs and cats should first ensure that their Philippine importer is registered with the Philippine Bureau of Animal Industry (BAI) and approved by BAI to import commercial shipments of pet dogs and cats.
 - If the Philippine importer is not registered with BAI, he/she can apply to be registered via the following web address:
<https://www.intercommerce.com.ph>.
 - [A User's Guide for the Registration Process](#) - March 2021
 - The registered Philippine importer will obtain the required Philippine import permit (known by the acronym "SPSIC") from BAI and provide a copy of the SPSIC to the U.S. exporter.
 - There are no BAI restrictions on the number of dogs and/or cats that can be listed on a commercial SPSIC.
 - The SPSIC will specify the animal health import requirements for the commercial U.S. origin dogs and/or cats that must be met prior to travel to

the Philippines.

- Your private USDA accredited veterinarian will then issue an export health certificate in accordance with the criteria listed in the SPSIC. The USDA accredited veterinarian can use the [APHIS Form 7001, the "United States Interstate and International Certificate of Health Examination for Small Animals"](#) OR use the [Veterinarian Export Health Certification System \(VEHCS\)](#).
- The corresponding export health certificate can only list the same number animals that are identified on the SPSIC. The number of animals listed on the SPSIC should match the number of animals listed on the APHIS export health certificate.
- All health certificates for commercial U.S. origin dogs and cats to the Philippines must be issued by a USDA accredited veterinarian, and then endorsed by USDA-APHIS prior to travel.
- The issuing USDA accredited veterinarian can upload the completed health certificate and submit the form electronically to APHIS for endorsement, through the [Veterinary Export Health Certification System \(VEHCS\)](#).
- APHIS endorsement may occur digitally in [VEHCS](#), and a paper copy of the final health certificate **must** accompany the shipment.
- For non-commercial pet dogs and cats to the Philippines, please click [here](#)

.

Pets

Visit the [APHIS Pet Travel Website](#) for information about exporting your pets.

If your species is not listed, the requirements for that species are not known. Exporters who want to ship livestock or germplasm whose requirements are not listed above should have the importer or buyer in the destination country apply for an import permit at the appropriate ministry. This import permit will most likely outline the specific requirements.

Need Help?

Export Trade Services (by State)

APHIS has animal health officials available nationwide with expertise in export requirements for animals. Contact your nearest office for questions about endorsing an export or health certificate for live animals.
