PPA 7721: Plant Pest and Disease Management and Disaster Prevention Program

Last Modified:

Under the authority of the Plant Protection Act Section 7721 (PPA 7721), APHIS provides up to \$73 million annually to fund stakeholder projects submitted through the Plant Pest and Disease Management and Disaster Prevention Program

(PPDMDPP). The projects we fund represent critical needs and safeguard American agriculture and natural resources against plant pests and diseases.

Federal and State agencies, nonprofit organizations, Tribal nations and Tribal partners, colleges and universities, and industry submit projects under APHIS' goals:

1. Enhance plant pest and disease analysis and survey.
2. Target domestic inspection activities at vulnerable points in the safeguarding continuum.
3. Enhance and strengthen pest identification and technology.
4. Safeguard nursery production.
5. Conduct targeted outreach and education.
6. Increase mitigation and rapid response capabilities.

If you're looking for information on specific plant pests and diseases, visit [Plant Pests and Diseases](#).

FY 2027 Information for Suggesters

Open Period Coming Soon

The open period to submit suggestions for PPDMDPP funding will begin in June and last 8 weeks. When the open period begins, an announcement will be available on this page under "Open PPDMDPP Funding Opportunities."

The newly released Fiscal Year (FY) 2027 Implementation Plan provides PPDMDPP background information, objectives and strategies of the six goal areas, and key details to assist in developing high-quality suggestions.

To prepare for submitting suggestions, review the implementation plan and other resources below.

Informational Webinars

In June and July, APHIS is hosting a series of virtual training webinars to give an overview of the suggestion submission process and assist suggesters with submitting high-quality suggestions. Information to be covered will include:

- The six PPDMDPP goal areas,
- Aligning suggestions to the correct goal area and objective,
- Instructing first-time suggestion submitters on how to register for a [USDA eAuthentication account](#) (needed to submit a suggestion), and
- Demonstrating how to submit a suggestion in ServiceNow.

Everyone interested in submitting a suggestion is encouraged to attend one of the informational webinars and confirm that you can access [ServiceNow](#). All of the webinars are open to the public; advance registration is required for general audience webinars.

Scheduled dates include June 23, June 25, July 8, and July 14 for general audiences. We will also offer two webinars for Tribal audiences on June 24, and July 15.

Links to the webinars will be posted when the open period is announced.

Open PPDMDPP Funding Opportunities

No opportunities are open at this time. Please check back soon or sign up to receive emails about future opportunities.

PPDMDPP and the Farm Bill

The 2008 Farm Bill established the PPDMDPP. The Agricultural Act of 2014 (also known as the 2014 Farm Bill) amended the Plant Protection Act to combine the [National Clean Plant Network](#) (NCPN) and the PPDMDPP, making them permanent. It also authorized funding for both programs, giving \$75 million per year in Commodity Credit Corporation funding in FY 2018. Funding was increased to \$90 million per year for FY 2026 and beyond. At least \$5 million must go to NCPN annually. Both programs—PPDMDPP and NCPN—are codified under the Plant Protection Act Section 7721.
