One Health Current Funding Opportunities

Last Modified:

Partnerships and leveraging external innovations, tools, and capacity are critical to the success of this program. These funding opportunities will help leverage both prior and new One Health partnerships while working toward the goal of preventing or minimizing the next pandemic, and addressing future One Health challenges.

Antimicrobial Resistance Dashboard Funding Opportunity

The United States Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS) Veterinary Services (VS) is announcing the availability of a second round of cooperative agreement funding to carry out the Antimicrobial Resistance Dashboard (AMR Dashboard) as described in the U.S. House of Representatives [Report for the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Bill, 2021](#). Through public-private partnerships, USDA APHIS will develop and utilize antimicrobial resistance dashboard tools to improve access to information on antimicrobial resistance in domesticated animals, including livestock, poultry, and companion animals.

All antimicrobial resistance dashboard tools developed will provide data protections similar to the Confidential Information Protection and Statistical Efficiency Act. Once created, the antimicrobial resistance dashboard tools will be used to monitor trends in antimicrobial resistance patterns, detect emerging resistance profiles, and better understand relationships between antimicrobial use and animal health management practices and antimicrobial resistance.

Additional details about this funding opportunity, including additional information for applicants, are available below.

Entities who are eligible to apply for AMR Dashboard Funds:

- State departments of agriculture
- Offices of the chief animal health official of a State
- Nonprofits
- Institutions of higher education
- State or national livestock, poultry, or aquaculture producer organizations with direct and significant economic interest in livestock, poultry, or aquaculture production
- State, national, allied, or regional veterinary organizations or specialty boards recognized by the American Veterinary Medical Association
- Tribal entities

Information about AMR Dashboard Funding Opportunities

APHIS is offering a second round of competitive funding opportunities to support the development and utilization of dashboards to address the One Health challenge of antimicrobial resistance. USDA APHIS Veterinary Services is excited to announce the 2024 AMR Dashboard Funding Opportunity. **The application deadline is May 20, 2024, 11:59 PM Eastern Time.**
