Importing Live Cattle and Bison From Mexico to the United States

Last Modified:

Livestock trade through U.S. ports of entry along the southern border is currently **closed** due to New World screwworm in Mexico. For more information, see the latest [USDA press release](#).

APHIS regulates the importation of all ruminants and their germplasm (embryos/oocytes, semen, cloning tissue) to prevent the spread of animal diseases. **Ruminants** include all animals that chew the cud, such as cattle, buffaloes, sheep, goats, deer, antelopes, camels, llamas, and giraffes.

Bovine Embryos

Bovine embryos are **not** permitted to be imported from Mexico at this time.

Bovine Semen

Bovine semen is **not** permitted to be imported from Mexico at this time.

What You Need To Know

- U.S. transits are classified as shipments presented to a U.S. port of entry for conveyance purposes to then be transported to a destination country shortly after.
 - [Notice Regarding APHIS Live Animal Import and Third-Country Import Transit Permits](#)
- Please note that any animals and their germplasm transiting the United States must not transit countries with questionable disease statuses prior to reaching a U.S. port of entry.
- All transits require a contingency plan. Submit your contingency plan with your permit application ([VS 17-129](#) (211.74 KB)) to laipermits@usda.gov. To submit an import permit electronically, visit [APHIS eFile](#).
- If you are applying to import live animals, semen, and embryos, you may submit applications by email to laipermits@usda.gov.
