Generally Authorized Non-Propagative Plant Products

Last Modified:

The following plant products DO NOT require an import permit or need to meet any USDA APHIS requirements and are generally admissible from all countries, unless specified, into the United States. Please note that this list is not all inclusive and all commodities are subject to inspection upon arrival into various ports of entry staffed by Customs and Border Protection officials.

¹Many plants are protected under the Convention for the International Trade in Endangered Species of Wild Fauna and Flora (CITES). The plants listed in CITES are considered threatened with extinction due to excessive harvesting and trade. To prevent their extinction, CITES member countries monitor and control the trade in CITES plants through the issuance of permits. Customs and Border Protection (CBP), through its Memorandum of Agreement with PPQ, regulates imported, nonliving CITES plant materials by enforcing 50 CFR § 23 and 50 CFR § 24. Products produced from some CITES-protected plants may require permits.
