Pet Travel From the United States to Australia

Last Modified:

Electronic Signature **ACCEPTED**; Original Ink Endorsement **REQUIRED**

For Accredited Veterinarians: Electronic signature ACCEPTED

For APHIS VMO: Original ink endorsement REQUIRED

USDA-accredited veterinarians can electronically issue health certificates and use VEHCS (Veterinary Export Health Certification System) to submit them to USDA for endorsement.

USDA must ink-sign and emboss the health certificate.

What This Means for You

Accredited Veterinarians: Use the links below to access or get help with VEHCS. Learn more about [how to issue export health certificates](#).

Animal Owners/Shippers: You can arrange to have your health certificate returned by mail (a prepaid, preaddressed return label must be provided during

certificate submission). The endorsed health certificate—ink-signed and embossed—must accompany the animal(s) during shipment or travel.

[VEHCS Help](#) | [VEHCS Guide](#) (7.58 MB) | [VEHCS Login](#)

Electronic Signature and Digital Endorsement ACCEPTED

For Accredited Veterinarians: Electronic signature ACCEPTED

For APHIS VMO: Digital endorsement ACCEPTED

USDA-accredited veterinarians can electronically issue health certificates and use VEHCS (Veterinary Export Health Certification System) to submit them to USDA for digital endorsement.

USDA can digitally endorse the health certificate and return it electronically.

What This Means for You

Accredited Veterinarians: Use the links below to access or get help with VEHCS. Learn more about [how to issue export health certificates](#).

Animal Owners/Shippers: The endorsed health certificate can be printed out directly from VEHCS and does **not** have to be mailed back to you. The printed, endorsed health certificate must accompany the animal(s) during shipment or travel.

[VEHCS Help](#) | [VEHCS Guide](#) (7.58 MB) | [VEHCS Login](#)

Electronic Signature ACCEPTED; Digital Endorsement for SOME COMMODITIES ONLY

For Accredited Veterinarians: Electronic signature ACCEPTED

For APHIS VMO: Digital endorsement for SOME COMMODITIES ONLY

USDA-accredited veterinarians can electronically issue health certificates and use VEHCS (Veterinary Export Health Certification System) to submit them to USDA for endorsement.

Digital endorsement varies by species—see requirements on this page for details. The health certificate either bears the original ink signature and embossed seal **or** digital signature/seal.

What This Means for You

Accredited Veterinarians: Use the links below to access or get help with VEHCS. Learn more about [how to issue export health certificates](#).

Animal Owners/Shippers: Digitally endorsed health certificates can be printed out directly from VEHCS. For non-digitally endorsed health certificates, you can arrange to have your health certificate returned by mail (a prepaid, preaddressed return label must be provided during certificate submission). A paper version of the endorsed health certificate must accompany the animal(s) during shipment or travel.

Travel Requirements Based on Pet Type

Carefully read ALL of the requirements related to your pet on this page.

- This page provides the most recent entry requirements and can change without notice.
- It is the responsibility of the veterinarian to make sure the pet has met all health requirements of the destination country before issuing a health certificate.
- Failure to meet the requirements may result in problems gaining certificate endorsement or difficulties upon arrival in the destination country.
- Health certificates must be legible, accurate, and complete.

On April 22, 2026, the new EU legislation EU2026/131 came into effect for the export of non-commercial dog, cats, ferrets, and birds and EU 2026/848 for the commercial dogs, cats, and ferrets. There is a transition period for implementation of the new certificates. APHIS is working on the formatting of these certificates to make them publicly available, as soon as possible.

The new non-commercial health certificates will go into effect on October 1, 2026. The current certificates can be endorsed on or before September 30, 2026.

The commercial dogs, cats, and ferrets certificate will go into effect on October 17, 2026. The current certificate can be endorsed on or before October 16, 2026.

Transiting the European Union (EU)

According to EU 2026/131 Article 5, non-commercial dogs, cats, ferrets or birds transiting the EU to another country, do not need an EU health certificate.

- Only pets that qualify as non-commercial are not required to have a health certificate. If the dog is traveling unaccompanied, they need to use a commercial certificate and are not eligible for the transit exemption.
- If the pet is waiting in a pet hotel at the airport for the next flight, the pet hotel may not be considered part of the international transit zone. Each port may define the international zone differently. Please confirm with the port officials ahead of time and plan accordingly.

[Expand All](#)

Dogs and Cats From Other Countries Traveling to the United States and Then to Australia

For dogs and cats traveling from other countries to the United States and then to Australia, [read this guidance](#) (108.46 KB) first.

Dogs and Cats From U.S. States (Except Hawaii and Guam)

Read and follow Australia's step-by-step guides for dogs and cats:

[Step-by-Step Guide for Dogs](#)

[Step-by-Step Guide for Cats](#)

More Guidance

The following information clarifies certain requirements outlined in Australia's step-by-step guides. Please read it carefully.

[Expand All](#)

Using a USDA-Accredited Veterinarian

The veterinarian(s) who prepares the pet for export to Australia (includes scanning the microchip, drawing blood, completing the laboratory submission forms, etc.) **must** be a **USDA-accredited veterinarian** in the State where they perform work.

[Pet Owners—Find an Accredited Veterinarian](#)

[Check Accreditation Status \(Veterinarians Only\)](#)

Completing the Identity Declaration

This section is for **optional step 3.2, "Confirm your dog's [or cat's] identity,"** in Australia's step-by-step guide for [dogs](#) or [cats](#).

Pets that complete this identity check will be eligible for **10 days** in post-entry quarantine upon arrival into Australia. If you cannot fully meet this identity check process as outlined, the pet will need to spend **30 days** in post-entry quarantine upon arrival in Australia.

Follow the instructions below (steps 1-12) to have your pet's identity verified.

There are multiple fees for this service, as noted below.

Identity declarations are valid for as long as the animal:

- can be identified by the verified microchip on the declaration, **and**
- resides in an [approved country](#).

Part 1

1. Take your pet to a USDA-accredited veterinarian and have them complete the [identity declaration](#) (324.71 KB).
 - The veterinarian may complete the declaration directly within [VEHCS](#). They do not need to fill out the PDF version.
2. The accredited veterinarian **must** take a color photo(s) of the pet and the microchip scanner with the microchip number visible.
 - At least one photo should have both the scanner, with the microchip number visible, and at least a significant portion of the pet together in the same photo.
3. The accredited veterinarian **must** use [VEHCS](#) to submit the identity declaration and photo(s) to USDA for endorsement.
 - A [user fee](#) to USDA is required for the endorsement of the declaration.
 - In VEHCS, click "New Certificate."
 - For "Destination Country," select "Australia."
 - For "Commodity Type," select "Dogs & cats - ID declaration part 1 or 2."
 - VEHCS will generate the certificate. The veterinarian does not need to fill out the PDF form before going to VEHCS.
 - On the "Attachments" screen, upload the photo(s).
4. After the accredited veterinarian submits the identity declaration and photo(s) in [VEHCS](#), USDA will review and endorse. The accredited veterinarian **must** provide the endorsed certificate number to you (the pet owner/exporter).

Part 2

5. After completing steps 1–4 in Part 1, you must take your pet to a **different** USDA-accredited veterinarian at a **different** veterinary clinic and have them complete a new [identity declaration](#) (324.71 KB).
 - The veterinarian may complete the declaration directly within [VEHCS](#). They do not need to fill out the PDF version.
 - The two accredited veterinarians should work at different clinics.
6. The second accredited veterinarian **must** take a color photo(s) of the pet and the microchip scanner with the microchip number visible.
 - At least one photo should have both the scanner, with the microchip number visible, and at least a significant portion of the pet together in the same photo.
7. The second accredited veterinarian **must** use [VEHCS](#) to submit the identity declaration and photo(s) to USDA for endorsement.
 - A [user fee](#) to USDA is required for the endorsement of the declaration.
 - In VEHCS, click "New Certificate."
 - For "Destination Country," select "Australia."
 - For "Commodity Type," select "Dogs & cats - ID declaration part 1 or 2."
 - VEHCS will generate the certificate. The veterinarian does not need to fill out the PDF form before going to VEHCS.
 - On the "Attachments" screen, upload the photo(s).
8. After the accredited veterinarian submits the identity declaration and photo(s) in [VEHCS](#), USDA will review and endorse. The accredited veterinarian **must** provide the endorsed certificate number to you (the pet owner/exporter).

Blood cannot be drawn for the rabies neutralizing antibody titer test (RNATT) until after the date of the second microchip scanning (can be done on same day). Part 3 below MUST still be completed by the accredited veterinarian.

Part 3

Part 3 **must** be endorsed within **3 months** of the date of the first microchip scanning. Please submit requests in a timely manner.

9. One of the accredited veterinarians **must** then logon to [VEHCS](#) and submit a request for completion of the USDA identity declaration (required by Australia) by uploading a [completed request form](#) (126.07 KB). The exporter **must** provide the veterinarian with the [VEHCS](#) endorsed certificate number for both accredited veterinarian declarations that were completed.
 - A [user fee](#) to USDA is required for the endorsement of the declaration.
 - In VEHCS, click "New Certificate."
 - For "Destination Country," select "Australia."
 - For "Commodity Type," select "Commodity not listed."
 - Click the "Next" button, and then for "Commodity Type," select "Dogs & cats - final ID declaration part 3."
 - On the "Upload PDF" screen, upload the completed request form.
10. After the request is submitted, USDA will complete a separate identity declaration, based on the information provided by the two accredited veterinarians in the first and second accredited veterinarian identity declarations. USDA will upload the endorsed USDA identity declaration in [VEHCS](#) and email it directly to Australia.
11. Once the USDA identity declaration certificate is marked "Completed" in [VEHCS](#), you/the exporter may then proceed to the next step in Australia's step-by-step guide for [dogs](#) or [cats](#).
12. You **must** retain a copy of the endorsed USDA identity declaration to attach to the export health certificate that must accompany the pet during travel to Australia.

Rabies Neutralizing Antibody Titer Test Declaration

Follow step 4 in Australia's step-by-step guide for [dogs](#) or [cats](#) to complete the rabies neutralizing antibody titer test (RNATT) and [RNATT Declaration](#) (270.64 KB).

A **USDA-accredited veterinarian** must scan the pet's microchip (dogs and cats) and collect the blood sample for the RNATT. The USDA-accredited veterinarian that drew the blood must complete the laboratory submission form, including the animal's microchip number and the blood sampling date.

Once you receive the RNATT laboratory report, you need to obtain an endorsed [RNATT Declaration](#) (270.64 KB) from [USDA](#). We strongly recommend that the pet's USDA-accredited veterinarian use [VEHCS](#) to request the RNATT Declaration. You **must** retain a copy of the endorsed RNATT Declaration to attach to the export health certificate that must accompany the pet during travel to Australia.

- In VEHCS, click "New Certificate."
 - For "Destination Country," select "Australia."
 - For "Commodity Type," select "Commodity not listed."
 - Click the "Next" button, and then for "Commodity Type," select "Dogs and cats - RNATT Declaration for Australia."
 - On the "Upload PDF" screen, upload a blank RNATT declaration for USDA to complete.
 - On the "Attachments" screen, upload the RNATT laboratory report and rabies vaccination certificate.

6-Month Waiting Period

The dog or cat is only eligible for export to Australia at least **180 days after** the blood sample arrives at the laboratory for the RNATT. You can find more information about the waiting period on your import permit issued by Australia.

Testing for *Brucella Canis*

Australia requires **intact** dogs to be tested for *Brucella canis*, using one of the following test types (listed on the export health certificate):

- RSAT
- TAT
- IFAT

Only the standard versions of the tests listed above will be accepted.

The following tests are **not** approved:

- 2ME-RSAT
- 2ME-TAT
- AGID/AGID II
- Canine Brucella Multiplex Assay
- Brucella Slide Agglutination/AGID II combination test

Health Certificate Information

We strongly recommend that USDA-accredited veterinarians use [VEHCS](#) to complete the export health certificate for submission to USDA. USDA **must** endorse the export health certificate. [Find a USDA endorsement office.](#)

- When creating the certificate in [VEHCS](#):
 - For "Destination Country," select "Australia."
 - For "Commodity Type," select either "Dog from U.S. States (except Hawaii and Guam)" or "Cat from U.S. States (except Hawaii and Guam)."
- The USDA-accredited veterinarian must use the health certificate available in [VEHCS](#) or the applicable health certificate listed below (the veterinarian may navigate directly to VEHCS without downloading this PDF). The health certificate provided in the Australian-issued import permit is not specific for pets from the United States.
 - [Dog from U.S. States \(except Hawaii and Guam\)](#) (306.68 KB)
 - [Cat from U.S. States \(except Hawaii and Guam\)](#) (229.82 KB)
- Leptospirosis vaccination section on new model health certificate:
 - If the pet received a primary course (two vaccinations) before export, the accredited veterinarian must record the details of **both** vaccinations on the health certificate.
 - If the pet received an annual booster before export, the accredited veterinarian must record the details of that vaccination **and** the details of the last vaccination given before the booster.

Documents for Travel

The following completed and **USDA-endorsed** documents must accompany your pet for travel to Australia:

- Part 3 USDA Identity Declaration (if this option was chosen)
- RNATT Declaration
- Laboratory Reports
- Export Health Certificate

Dogs and Cats From Hawaii or Guam

Read and follow Australia's step-by-step guides for dogs and cats:

[Step-by-Step Guide for Dogs](#)

[Step-by-Step Guide for Cats](#)

More Guidance

The following information clarifies certain requirements outlined in Australia's step-by-step guides. Please read it carefully.

[Expand All](#)

Using a USDA-Accredited Veterinarian

The veterinarian(s) who prepares the pet for export to Australia (includes scanning the microchip, drawing blood, completing the laboratory submission forms, etc.) **must** be a **USDA-accredited veterinarian** in the State where they perform work.

[Pet Owners—Find an Accredited Veterinarian](#)

[Check Accreditation Status \(Veterinarians Only\)](#)

Completing the Identity Declaration

This section is for **required step 4, "Confirm your dog's [or cat's] identity,"** in Australia's step-by-step guide for [dogs](#) or [cats](#).

Pets from Hawaii and Guam **must fully** complete the identity check process to export to Australia under the Category 2 import conditions. If you cannot complete the identity check process, contact Australia's Department of Agriculture, Fisheries and Forestry at imports@agriculture.gov.au for advice before proceeding with any other steps.

Follow the instructions below (steps 1-12) to have your pet's identity verified.

There are multiple fees for this service, as noted below.

Identity declarations are valid for as long as the animal:

- can be identified by the verified microchip on the declaration, **and**
- resides in a [group 1 or group 2 approved country](#).

Part 1

1. Take your pet to a USDA-accredited veterinarian and have them complete the [identity declaration](#) (324.71 KB).
 - The veterinarian may complete the declaration directly within [VEHCS](#). They do not need to fill out the PDF version.
2. The accredited veterinarian **must** take a color photo(s) of the pet and the microchip scanner with the microchip number visible.
 - At least one photo should have both the scanner, with the microchip number visible, and at least a significant portion of the pet together in the same photo.
3. The accredited veterinarian **must** use [VEHCS](#) to submit the identity declaration and photo(s) to USDA for endorsement.
 - A [user fee](#) to USDA is required for the endorsement of the declaration.
 - In VEHCS, click "New Certificate."

- For “Destination Country,” select “Australia.”
 - For “Commodity Type,” select "Dogs & cats - ID declaration part 1 or 2."
 - VEHCS will generate the certificate. The veterinarian does not need to fill out the PDF form before going to VEHCS.
 - On the “Attachments” screen, upload the photo(s).
4. After the accredited veterinarian submits the identity declaration and photo(s) in [VEHCS](#), USDA will review and endorse. The accredited veterinarian **must** provide the endorsed certificate number to you (the pet owner/exporter).

Part 2

5. After completing steps 1–4 in Part 1, you must take your pet to a **different** USDA-accredited veterinarian at a **different** veterinary clinic and have them complete a new [identity declaration](#) (324.71 KB).
- The veterinarian may complete the declaration directly within [VEHCS](#). They do not need to fill out the PDF version.
 - The two accredited veterinarians should work at different clinics.
6. The second accredited veterinarian **must** take a color photo(s) of the pet and the microchip scanner with the microchip number visible.
- At least one photo should have both the scanner, with the microchip number visible, and at least a significant portion of the pet together in the same photo.
7. The second accredited veterinarian **must** use [VEHCS](#) to submit the identity declaration and photo(s) to USDA for endorsement.
- A [user fee](#) to USDA is required for the endorsement of the declaration.
 - In VEHCS, click "New Certificate."
 - For “Destination Country,” select “Australia.”
 - For “Commodity Type,” select “Dogs & cats - ID declaration part 1 or 2.”
 - VEHCS will generate the certificate. The veterinarian does not need to fill out the PDF form before going to VEHCS.
 - On the “Attachments screen,” upload the photo(s).
8. After the accredited veterinarian submits the identity declaration and photo(s) in [VEHCS](#), USDA will review and endorse. The accredited veterinarian **must**

provide the endorsed certificate number to you (the pet owner/exporter).

Part 3 below MUST still be completed by the accredited veterinarian.

Part 3

Part 3 **must** be endorsed within **3 months** of the date of the first microchip scanning. Please submit requests in a timely manner.

9. One of the accredited veterinarians **must** then logon to [VEHCS](#) and submit a request for completion of the USDA identity declaration (required by Australia) by uploading a [completed request form](#) (126.07 KB). The exporter **must** provide the veterinarian with the [VEHCS](#) endorsed certificate number for both accredited veterinarian declarations that were completed.
 - A [user fee](#) to USDA is required for the endorsement of the declaration.
 - In VEHCS, click "New Certificate."
 - For "Destination Country," select "Australia."
 - For "Commodity Type," select "Commodity not listed."
 - Click the "Next" button, and then for "Commodity Type," select "Dogs & cats - final ID declaration part 3."
 - On the "Upload PDF" screen, upload the completed request form.
10. After the request is submitted, USDA will complete a separate identity declaration, based on the information provided by the two accredited veterinarians in the first and second accredited veterinarian identity declarations. USDA will upload the endorsed USDA identity declaration in [VEHCS](#) and email it directly to Australia.
11. Once the USDA identity declaration certificate is marked "Completed" in [VEHCS](#) , you/the exporter may then proceed to the next step in Australia's step-by-step guide for [dogs](#) or [cats](#).
12. You **must** retain a copy of the endorsed USDA identity declaration to attach to the export health certificate that must accompany the pet during travel to Australia.

Testing for Brucella Canis

Australia requires **intact** dogs to be tested for *Brucella canis*, using one of the following test types (listed on the export health certificate):

- RSAT
- TAT
- IFAT

Only the standard versions of the tests listed above will be accepted.

The following tests are **not** approved:

- 2ME-RSAT
- 2ME-TAT
- AGID/AGID II
- Canine Brucella Multiplex Assay
- Brucella Slide Agglutination/AGID II combination test

Health Certificate Information

Regarding Crate Seal: *Before* submitting the health certificate to USDA for endorsement, the pet's veterinarian must contact the [USDA endorsement office](#) to obtain an official seal, which must be placed on the pet's crate on the day of departure. The pet's veterinarian must record the seal number on the health certificate *before* submitting it to USDA.

We strongly recommend that USDA-accredited veterinarians use [VEHCS](#) to complete the export health certificate for submission to USDA. USDA **must** endorse the export health certificate. [Find a USDA endorsement office](#).

- When creating the certificate in [VEHCS](#):
 - For "Destination Country," select "Australia."
 - For "Commodity Type," select either "Dog from Hawaii or Guam" or "Cat from Hawaii or Guam."
- The accredited veterinarian must use the health certificate available in [VEHCS](#) or the applicable health certificate listed below (the veterinarian may navigate directly to VEHCS without downloading this PDF). The health certificate

provided in the Australian-issued import permit is not specific for pets from the United States.

- [Dog from Hawaii or Guam](#) (1.23 MB)
- [Cat from Hawaii or Guam](#) (250.89 KB)
- Leptospirosis vaccination section on new model health certificate:
 - If the pet received a primary course (two vaccinations) before export, the accredited veterinarian must record the details of **both** vaccinations on the health certificate.
 - If the pet received an annual booster before export, the accredited veterinarian must record the details of that vaccination **and** the details of the last vaccination given before the booster.

Documents for Travel

The following completed and **USDA-endorsed** documents must accompany your pet for travel to Australia:

- Part 3 USDA Identity Declaration
- Laboratory Reports
- Export Health Certificate

Other Pets

For pet travel requirements not listed, APHIS has not been officially informed by the foreign country about the requirements for your pet's travel. We recommend that you contact a government official of the country you are traveling to for more information.

* Northern Ireland is part of the United Kingdom (UK), but will continue to follow European Union (EU) requirements even though the UK is no longer part of the EU.

** Norway and Switzerland are **not** part of the EU but have adopted EU legislation for import of most species of live animals.

Important Travel Considerations

Considerations for airline travel and cruises:

Airlines and shipping lines have their own policies and requirements for transporting pets. Check with your airline or shipping representative to determine what requirements they may have.

[Learn how you can improve the safety of dogs and cats during air travel.](#)

[View additional information for pet owners, airlines, and others about APHIS endorsement of international health certificates \(239.52 KB\).](#)

If pets or support animals accompany you on a cruise, you must comply with entry rules for **every** country or port where your pet or support animal exits the ship.

Will you be returning to the United States with your pet?

[View APHIS Requirements](#)

ALERT: CDC is the primary authority for dog imports. For requirements or questions about dogs entering or returning to the United States, visit the [CDC website](#).

If you are transiting (passing through) the European Union:

If your pet is traveling through (transiting) a country in the European Union (EU) on the way to a third, non-EU country, you will also need a transit health certificate for your pet for the EU. The transit health certificate will be the same as if your pet's final destination was the EU country. Use the information and steps above under "Travel Requirements Based on Pet Type" to determine which health certificate should be used. [View a list of EU countries](#).
