Pet Travel From the United States to South Africa

Last Modified:

Travel Requirements Based on Pet Type

Carefully read ALL of the requirements related to your pet on this page.

- This page provides the most recent entry requirements and can change without notice.
- It is the responsibility of the veterinarian to make sure the pet has met all health requirements of the destination country before issuing a health certificate.
- Failure to meet the requirements may result in problems gaining certificate endorsement or difficulties upon arrival in the destination country.
- Health certificates must be legible, accurate, and complete.

Alert

All pet veterinary health certificates to South Africa **MUST BE** endorsed by USDA-APHIS, including Service and Emotional Support Animals.

All disease testing, including test type, must comply with the requirements outlined on the veterinary health certificate. Failure to comply with the requirements in the

veterinary health certificate may result in the pet being returned to the U.S. or euthanized.

[Expand All](#)

Cats

A veterinary import permit is required for all cats traveling to S. Africa. Veterinary import permit applications and further information can be found on the Republic of South Africa's website at <https://www.gov.za/services/import/import-animals-and-animal-products>. The completed veterinary permit applications can be sent to the Permit Office at VetPermits@daff.gov.za.

The requirements for traveling with your pet are described in the health certificate.

[Veterinary Health Certificate for Cats](#) (99.26 KB)

Dogs

A veterinary import permit is **required** for all dogs and cats traveling to South Africa. Veterinary import permit applications and further information can be found on the Republic of South Africa's website at <https://www.gov.za/services/import/import-animals-and-animal-products>. The completed veterinary permit applications can be sent to the Permit Office at VetPermits@daff.gov.za.

If South Africa approves the import application, they will issue an import permit and provide the required veterinary health certificate which will detail the entry requirements. Please share the import permit and veterinary health certificate with your USDA-accredited veterinarian as soon as you have received it.

U.S. origin **dogs** entering South Africa are required to be test negative for *Trypanosoma evansi* (surra) on **both** the CATT and Giemsa blood smear tests. All

surra testing must occur at one of the two internationally recognized OIE Reference Laboratories for surra testing (see below for further instructions on sample submission procedures).

All other required tests must be completed at an officially approved laboratory located in the United States.

The animal's microchip number must be recorded on all laboratory reports.

APHIS endorsement of the health certificate is required after it has been issued by a USDA Accredited Veterinarian. Health certificate issuance and endorsement must occur within 10 days of the pet's travel.

Sample Submission to the Institute of Tropical Medicine, Belgium

Note: The Institute of Tropical Medicine highly recommends that U.S. sample submitters either create their own account DHL International Shipping or use a commercial laboratory (Ex: ANTECH) when sending samples to Belgium to avoid samples being returned.

***You must forward the shipment tracking number to the Institute of Tropical Medicine Antwerp dispatching service **in advance of the shipment:**
shipments@itg.be and surra@itg.be

Per the ITM Import Permit, the text “**Diagnostic samples - Do not open during transport**” must be printed on the parcel, along with a copy of the ITM Import Permit attached to the exterior.

Institute of Tropical Medicine Antwerp
Applied Technology and Production Unit
Nationalestraat 155
B-2000 Antwerpen

BELGIUM

Tel: +32 (0)3 247 63 74

surra@itg.be

PLEASE NOTE: The Institute of Tropical Medicine in Antwerp, Belgium will be closed from December 23, 2024, through January 5, 2025. No samples will be accepted during this time. The last day of routine testing for this year will be **Thursday, December 19th**. Any samples received after that time will not be tested until January 5, 2025.

Birds

Birds for export using the below health certificate must:

- Have a South African import permit
- Have been born and remained in captivity

- Have remained in the United States for at least 3 months prior to export to South Africa
- Be identified by means of closed leg rings or microchips
- Undergo a 28-day pre-export isolation in a facility (which could be a private residence) that was approved by an APHIS inspector before the start of isolation. To schedule an APHIS inspection, please contact your [APHIS Endorsement Office](#).
- Tested for avian influenza and Newcastle disease by means of both tracheal/oropharyngeal **and** cloacal swabs, twice at least 14 days apart, the second test being within 7 days of departure
- Be transported to South Africa in a sealed transport that is covered in mosquito proof netting

Other requirements are explained in the model health certificate below.

Lagomorphs (Rabbits, Hares and Pikas)

A veterinary import permit is required for all lagomorphs (including rabbits, hares and pikas) traveling to South Africa. Veterinary import permit applications and further information can be found on the Republic of South Africa's website at <https://www.gov.za/services/import/import-animals-and-animal-products>. The completed veterinary permit applications can be sent to the Permit Office at VetPermits@daff.gov.za.

The requirements for traveling with your pet are described in the health certificate.

Switzerland**

* Northern Ireland is part of the United Kingdom (UK), but will continue to follow European Union (EU) requirements even though the UK is no longer part of the EU.

** Norway and Switzerland are **not** part of the EU but have adopted EU legislation for import of most species of live animals.

Important Travel Considerations

Considerations for airline travel and cruises:

Airlines and shipping lines have their own policies and requirements for transporting pets. Check with your airline or shipping representative to determine what requirements they may have.

[Learn how you can improve the safety of dogs and cats during air travel.](#)

[View additional information for pet owners, airlines, and others about APHIS endorsement of international health certificates](#) (239.52 KB).

If pets or support animals accompany you on a cruise, you must comply with entry rules for **every** country or port where your pet or support animal exits the ship.

Will you be returning to the United States with your pet?

[View APHIS Requirements](#)

ALERT: If you're traveling with a dog, be aware that the [CDC has additional requirements for bringing a dog into the United States](#). You must follow CDC's requirements, or your dog will not be allowed to enter the United States.

If you are transiting (passing through) the European Union:

If your pet is traveling through (transiting) a country in the European Union (EU) on the way to a third, non-EU country, you will also need a transit health certificate for your pet for the EU. The transit health certificate will be the same as if your pet's final destination was the EU country. Use the information and steps above under "Travel Requirements Based on Pet Type" to determine which health certificate should be used. [View a list of EU countries](#).
