Pet Travel From the United States to Ukraine

Last Modified:

Electronic Signature **ACCEPTED**; Original Ink Endorsement **REQUIRED**

For Accredited Veterinarians: Electronic signature **ACCEPTED**

For APHIS VMO: Original ink endorsement **REQUIRED**

USDA-accredited veterinarians can electronically issue health certificates and use VEHCS (Veterinary Export Health Certification System) to submit them to USDA for endorsement.

USDA must ink-sign and emboss the health certificate.

What This Means for You

Accredited Veterinarians: Use the links below to access or get help with VEHCS. Learn more about [how to issue export health certificates](#).

Animal Owners/Shippers: You can arrange to have your health certificate returned by mail (a prepaid, preaddressed return label must be provided during

certificate submission). The endorsed health certificate—ink-signed and embossed—must accompany the animal(s) during shipment or travel.

Electronic Signature and Digital Endorsement ACCEPTED

For Accredited Veterinarians: Electronic signature ACCEPTED

For APHIS VMO: Digital endorsement ACCEPTED

USDA-accredited veterinarians can electronically issue health certificates and use VEHCS (Veterinary Export Health Certification System) to submit them to USDA for digital endorsement.

USDA can digitally endorse the health certificate and return it electronically.

What This Means for You

Accredited Veterinarians: Use the links below to access or get help with VEHCS. Learn more about [how to issue export health certificates](#).

Animal Owners/Shippers: The endorsed health certificate can be printed out directly from VEHCS and does **not** have to be mailed back to you. The printed, endorsed health certificate must accompany the animal(s) during shipment or travel.

Electronic Signature ACCEPTED; Digital Endorsement for SOME COMMODITIES ONLY

For Accredited Veterinarians: Electronic signature ACCEPTED

For APHIS VMO: Digital endorsement for SOME COMMODITIES ONLY

USDA-accredited veterinarians can electronically issue health certificates and use VEHCS (Veterinary Export Health Certification System) to submit them to USDA for endorsement.

Digital endorsement varies by species—see requirements on this page for details. The health certificate either bears the original ink signature and embossed seal **or** digital signature/seal.

What This Means for You

Accredited Veterinarians: Use the links below to access or get help with VEHCS. Learn more about [how to issue export health certificates](#).

Animal Owners/Shippers: Digitally endorsed health certificates can be printed out directly from VEHCS. For non-digitally endorsed health certificates, you can arrange to have your health certificate returned by mail (a prepaid, preaddressed return label must be provided during certificate submission). A paper version of the endorsed health certificate must accompany the animal(s) during shipment or travel.

Travel Requirements Based on Pet Type

Carefully read ALL of the requirements related to your pet on this page.

- This page provides the most recent entry requirements and can change without notice.
- It is the responsibility of the veterinarian to make sure the pet has met all health requirements of the destination country before issuing a health certificate.
- Failure to meet the requirements may result in problems gaining certificate endorsement or difficulties upon arrival in the destination country.
- Health certificates must be legible, accurate, and complete.

On April 22, 2026, the new EU legislation EU2026/131 came into effect for the export of non-commercial dog, cats, ferrets, and birds and EU 2026/848 for the commercial dogs, cats, and ferrets. There is a transition period for implementation of the new certificates. APHIS is working on the formatting of these certificates to make them publicly available, as soon as possible.

The new non-commercial health certificates will go into effect on October 1, 2026. The current certificates can be endorsed on or before September 30, 2026.

The commercial dogs, cats, and ferrets certificate will go into effect on October 17, 2026. The current certificate can be endorsed on or before October 16, 2026.

Transiting the European Union (EU)

According to EU 2026/131 Article 5, non-commercial dogs, cats, ferrets or birds transiting the EU to another country, do not need an EU health certificate.

- Only pets that qualify as non-commercial are not required to have a health certificate. If the dog is traveling unaccompanied, they need to use a commercial certificate and are not eligible for the transit exemption.
- If the pet is waiting in a pet hotel at the airport for the next flight, the pet hotel may not be considered part of the international transit zone. Each port may define the international zone differently. Please confirm with the port officials ahead of time and plan accordingly.

Dogs, Cats, and Ferrets

For non-commercial movement (personal pets) of dogs and cats from the United States to Ukraine:

- A health certificate issued by a USDA Accredited Veterinarian and endorsed by APHIS must accompany U.S. pets (dogs, cats, ferrets).
- Pets must be identified with a microchip or a clear tattoo (provided the tattoo was applied prior to July 3, 2011). The microchip must be ISO compliant.

- **Pets under 12 weeks of age** must not be vaccinated against rabies.
- **Pets over 12 weeks of age** must be current on rabies vaccinations and have a current rabies titer test:
 - Ukraine will accept a 3-year rabies vaccine, licensed for use in the United States. “Validity of vaccination” dates (i.e. 3 year rabies vaccine) must be completed.
 - If the pet has only received one rabies vaccine (a primary vaccination), or if a rabies booster vaccine was administered outside of the period of validity of the previous vaccination, the pet will be required to wait at least 21 days after vaccination before travel to the Ukraine.
 - Pets over 12 weeks of age must undergo a rabies neutralizing antibody titer test more than three (3) months prior to export, in an approved laboratory, with an antibody titer equal to or greater than 0.5 IU/ml. The test result remains valid indefinitely as long as there has been no lapse in rabies vaccination coverage since the date of the rabies titer test, and all vaccinations subsequent to the test date are documented on the health certificate. A copy of the laboratory results must be included with the health certificate at the time of arrival in the Ukraine.
- **Pets between 12 weeks and 16 weeks of age** (only) that are either, 1.) not vaccinated against rabies, or 2.) 21 days has not elapsed since primary rabies vaccination, the pet must meet one of the following conditions (as noted on the model health certificate), the pet either has:
 - from birth until the time of the non-commercial movement the cats, dogs and ferrets have had no contact with wild animals of species susceptible to rabies, **or**
 - *their female parents* have been vaccinated against rabies in accordance with OIE requirements *before breeding*.

Other Pets

For pet travel requirements not listed, APHIS has not been officially informed by the foreign country about the requirements for your pet’s travel. We recommend that

you contact a government official of the country you are traveling to for more information.

Slovakia
Slovenia
Spain
Sweden
Switzerland**

* Northern Ireland is part of the United Kingdom (UK), but will continue to follow European Union (EU) requirements even though the UK is no longer part of the EU.

** Norway and Switzerland are **not** part of the EU but have adopted EU legislation for import of most species of live animals.

Important Travel Considerations

Considerations for airline travel and cruises:

Airlines and shipping lines have their own policies and requirements for transporting pets. Check with your airline or shipping representative to determine what requirements they may have.

[Learn how you can improve the safety of dogs and cats during air travel.](#)

[View additional information for pet owners, airlines, and others about APHIS endorsement of international health certificates \(239.52 KB\).](#)

If pets or support animals accompany you on a cruise, you must comply with entry rules for **every** country or port where your pet or support animal exits the ship.

Will you be returning to the United States with your pet?

[View APHIS Requirements](#)

ALERT: CDC is the primary authority for dog imports. For requirements or questions about dogs entering or returning to the United States, visit the [CDC website](#).

If you are transiting (passing through) the European Union:

If your pet is traveling through (transiting) a country in the European Union (EU) on the way to a third, non-EU country, you will also need a transit health certificate for your pet for the EU. The transit health certificate will be the same as if your pet's final destination was the EU country. Use the information and steps above under "Travel Requirements Based on Pet Type" to determine which health certificate should be used. [View a list of EU countries](#).
