Great Britain - Export Animal Products NOT for Human Consumption

Last Modified:

Great Britain includes England, Wales, and Scotland; references to Great Britain should be interpreted to also mean the Channel Islands and the Isle of Man.

Regulations

[Regulation \(EC\) No 1069/2009](#) - as amended June 2019 (pdf 317kb)

[Regulation \(EU\) No 142/2011](#) - as amended November 2020 (pdf 8.95mb)

[Regulation \(EC\) No 999/2001](#) - as amended October 2020 (pdf 683kb)

Important Information

Read this information before accessing the commodity specific information listed below.

Great Britain requires facilities exporting animal by-products under retained EU legislation (Regulation (EC) 1069/2009 and its implementing regulation Regulation (EU) 142/2011) to be listed in the [List of establishments in non-EU countries](#)

[approved to export animal products to GB](#). APHIS understands that facilities listed in the EU TRACES database prior to September 30th, 2021, are also listed in Great Britain's database, but facilities are encouraged to confirm that they are listed prior to shipment to Great Britain. The process for a facility to apply to be listed in the Great Britain database is the same as the process to apply to be listed in TRACES. For more information on TRACES, see the [TRACES guidance document](#) (250.36 KB).

[Guidelines](#) (601.33 KB) for the Preparation of Certificates for Export of Animal-Origin Products to GB [Great Britain (England, Wales, and Scotland), Channel Islands, and Isle of Man]: Materials Not Intended for Human Consumption

Facilities must be listed by APHIS in compliance with Regulation (EU) 142/2011 to export the below commodities. Any exceptions would be noted in the specific article. Please contact your [VS Field Operations Veterinary Export Trade Services](#) for details on how to request required listings approvals and certificates. For commodities not listed below, please refer to the [IREGs for the European Union](#) for more information. Additional information pertinent to the export of certain products may also be available on the IREGs for the European Union. For all of the below listed commodities, the exporter will need to ensure the appropriate lineouts are done for all "delete as appropriate" statements. Please cross-reference the pertinent section of the EU IREGs page to identify which statements must be lined out based on the species and processing for the product to be exported.

Health Certificate Notice

Please **do not** print or include Certificate Note Pages with the Health Certificates to be endorsed.
