## **Great Britain - Untreated Non-Equidae Blood Products [GBHC096X; EU Chapter 4(C) equivalent]**

Last Modified:

**Model health certificate for untreated blood products, excluding those of equidae, for the manufacture of derived products for purposes outside the feed chain for farmed animals [4(C) equivalent]**

**To be eligible for this certificate, a facility must be listed for [and the materials must meet the requirements of] the Regulation 142/2011 as amended “CHAPTER 4(C) Health certificate for untreated blood products, excluding of equidae, for the manufacture of derived products for purposes outside the feed chain for farmed animals, intended for dispatch to or for transit through the European Union”.**

**Advisory regarding commercial documents e.g. company certificates of origin or analysis: Consignments of blood products may be rejected if accompanied by commercial documents containing more specific information than the below certificates. APHIS strongly recommends that exporters not include commercial documents (or other paperwork) with the consignments that make any claims regarding the origin of the blood products or about other information addressed in these certificates. The pre-lined out versions below contain the most specific assurances APHIS can provide for these consignments.**

Please select the appropriate certificate below based upon the species of origin of the blood product.

Options I through II.6 below are for materials exported in new or sterilized bags or bottles.

**I. Blood Products Derived from Avian Animals**

- A. From areas other than [HPAI Banned Areas](#) or [ND Banned Areas](#) (300.64 KB):

[Dispatch to GB](#) (240.02 KB)- January 2023

- B. Untreated blood products from HPAI Banned Areas or ND Banned Areas are not eligible for export to Great Britain at this time.

**II. Blood Products Derived from Bovine, Ovine, and/or Caprine Animals**

- A. Other than fetal bovine serum (FBS) and derivatives: The following certificate is for products derived from bovine, ovine, and/or caprine animals-except for fetal bovine serum (FBS):

This version may also be utilized for products containing both blood products derived from bovine/ovine/caprine animals and also blood products derived from ruminants other than bovine/ovine/caprine animals (e.g. if a shipment had a product containing both bovine blood and also deer blood).

[Dispatch to GB](#) (241.48 KB)- January 2023

- B. Fetal bovine serum (FBS) and derivatives: The following version may be used only for consignments containing only fetal bovine serum and/or derivatives of fetal bovine serum. No other animal origin materials may be included in the production of certified materials.

[Dispatch to GB](#) (241.6 KB)- January 2023

**III. Blood Products Derived from Ruminants other than Bovine, Ovine, and/or Caprine Animals**

[Dispatch to GB](#) (241.67 KB)- January 2023

**IV. Blood Products Derived from Artiodactyla, Perrissodactyla, and/or Proboscidea Animals Other than Ruminants**

[Dispatch to GB](#) (237.92 KB)- January 2023

**V. Blood Products Derived from Suidae/Tayassuidae Animals (includes Pigs)**

[Dispatch to GB](#) (242.09 KB)- January 2023

**VI. Blood products from Livestock OTHER THAN Artiodactyla, Perrissodactyla, Proboscidea, Suidae/Tayassuidae or Avian Animals that are collected in full or in part during FSIS slaughter inspection**

[Dispatch to GB](#) (242.12 KB)- January 2023

**VII. Blood products from Laboratory Animals (e.g. rodents) OTHER THAN Artiodactyla, Perrissodactyla, Proboscidea, Suidae/Tayassuidae, or Avian Animals [Not including derivatives of blood from livestock, e.g. rabbits, if collected during FSIS slaughter inspection]**

[Dispatch to GB](#) (241.51 KB)- January 2023

**VIII. Other**

The below versions should be utilized when:

1. Blood products are shipped in bulk containers rather than new or sterilized bags or bottles; and/or
2. Blood products derived from two or more of the following groups of animals are certified on the same GBHC096X certificate:

- Artiodactyla, Perrissodactyla, Proboscidea Animals (includes Ruminants);
- Suidae/Tayassuidae Animals (includes Pigs)

### 3. Avian Animals

To utilize these versions, the inappropriate text must be lined out prior to endorsement.

The text must be lined-out consistent with the pertinent versions above.

The only exception [to using the above referenced line-outs] is for blood products that are shipped in bulk containers. In the case of blood products that are shipped in bulk containers, Section II.7 should be lined out as follows:

II.7. the products were:

~~(2) either [packed in new or sterilised bags or bottles,]~~

(2) or [transported in bulk in containers or other means of transport that were thoroughly cleaned and disinfected with a disinfectant approved by the competent authority before use,] the outer packaging or containers bear labels indicating 'NOT FOR HUMAN OR ANIMAL CONSUMPTION';

[Dispatch to GB](#) (234.48 KB)- Other than avian - January 2023

[Transit GB](#) (236.93 KB)- Other than avian - January 2023

[Dispatch to GB](#) (234.06 KB)- Avian-origin - January 2023

[Transit GB](#) (234.92 KB)- Avian-origin - January 2023
