Students and Graduates

Follow Us

USDA Pathways Programs

We offer several career “pathways” for students and recent graduates in various fields through the USDA Pathways Programs. These pathways include paid internships for current students, a training and development program for recent graduates of any qualifying educational institution, and a fellowship program for recent graduates with an advanced or professional degree. (Students interested in the fellowship program may also apply in the fall of their final year of graduate school.) Pathways Programs may lead to a permanent position at USDA, without further competition, after completing the requirements.

Current Pathways Opportunities

To find and apply for current Pathways opportunities, go to USAJOBS (search “USDA Pathways”).

Go to USAJOBS

In addition, several Pathways internships available with APHIS include tuition assistance. These opportunities are for undergraduate and graduate students in nonveterinary fields of study, veterinary medicine (focused on animal health or animal welfare), and plant health science. To learn more, check out the program information below.

APHIS Career Experience Program

The APHIS Career Experience (ACE) program is a unique student internship opportunity that combines on-the-job technical training with leadership and professional development. ACE interns form a cohort of peers across academic and career tracks, learning and collaborating together throughout the year-long program. ACE is specifically designed to prepare successful interns for permanent positions within the agency after graduation.

ACE is open to rising college sophomore and junior students who are in good academic standing. Interns will work full time through the summer and continue working at least 16 hours a week through graduation.

Applicants will need current transcripts and proof of enrollment, a USAJOBS account, resume, and any veterans' documents.

Have questions about the ACE Program? Contact hrdhires@usda.gov

Chester A. Gipson Internship Program

Chester A. Gipson Internship Program (2.42 MB)

- Open to undergraduate and graduate students in veterinary medicine and related fields
- Up to $25,000 per year for undergraduate studies; up to $50,000 per year for graduate studies

- Paid employment during summer and school breaks as a Veterinary Student Trainee with APHIS Animal Care

Youth Programs

We offer summer youth outreach programs at colleges and universities nationwide for middle and high school students. These programs are a great opportunity to explore careers in agriculture.

AgDiscovery

In 2026, USDA, in partnership with 10 universities, will offer a 5-day summer day camp outreach program for middle and high school students to explore career paths in agricultural sciences.

Safeguarding Natural Heritage

Are you 13–17 years old? Explore the many careers in agriculture through this 2-week summer program, held at Tribal Colleges and Universities and Native American-Serving Institutions nationwide each year.
