Stakeholder Risk Assessment Consultation

Last Modified:

APHIS shares draft pest risk assessments with the public to determine whether stakeholders have information that might lead us to revise the draft assessment before we identify pest mitigations and proceed with official rulemaking. This service allows stakeholders to review and provide comments on draft risk assessments or pest lists for fruits, vegetables, plants, or plant products for a 30-day period.

As draft risk assessments and pest lists are made available for comment, they will be posted on this page with the date by which comments are due.

Comments Due

by:

Title

May 23, 2026

[Pyrus](#) and [Cydonia](#) from Belgium, Canada, France, Germany, Italy, the Netherlands and the United Kingdom

How To Submit Comments

Submit your comments to ppqpracomments@usda.gov.

You will need to include the name of the commodity assessed by the draft document (for example, apples, spruce trees) in the "Subject" line of your emailed comment.

Your comments will be considered for scientific and technical issues raised and may result in changes to the risk assessments or pest lists. However, we are unable to provide you with individual feedback regarding your comment. When providing comments, please note:

- You will not find mitigations for pests shown in draft pest lists and risk assessments. Risk management, including mitigations, is conducted after we receive stakeholder and country comments on each pest list or risk assessment.
- This stakeholder consultation service differs from providing official comments once a rule or notice is published in the Federal Register. You will have another opportunity to provide comments on our risk assessments or pest lists when the respective proposed rules or notices are available for comment in the Federal Register.

Stay Up to Date

Want to receive automatic notifications that risk assessments or pest lists have been posted to this web page for review and comment?

Subscribe to the "Risk Analysis and Assessments" topic on our [email list](#). You may also sign up for other topics of interest, such as "Fruits and Vegetables Imports" and "Plants for Planting." Find all of these topics on the list by expanding the headings "APHIS - Plant Health Information" > "Importation into the US" > "Entry Requirements."
