NCAH Portal Access Information

Last Modified:
[Print](#)

Access to the NCAH Portal is strictly controlled through a combination of security features. This page is designed to help you understand how to fulfill those requirements.

CVB Notices [16-14](#) and [17-03](#) contain access requirements.

[Pre-license establishments may or may not be eligible to access the NCAH Portal depending on where they are in the licensing process.](#)

eAuthentication Guidance Materials

Individual user access to the NCAH Portal is controlled by eAuthentication (eAuth); which is a separate USDA entity from the CVB. User access to CVB submissions on the NCAH Portal require a **verified identity** eAuth account. Posted below are user materials, FAQs and contact information for eAuth. If you have issues obtaining an eAuth account or access after getting an account, contact eAuth as CVB cannot help you with these.
