APHIS Launches Dashboard for U.S. Data on Wood Packing Material and Holds Instructional Webinar

[Print](#)

Contact: aphispress@usda.gov

WASHINGTON, DC- June 24, 2025 –The U.S. Department of Agriculture’s Animal and Plant Health Inspection Service (APHIS) recently launched a new dashboard that provides comprehensive data on wood packing material. This innovative tool

enhances transparency, improves decision making, and supports compliance with international phytosanitary standards.

The wood packing material dashboard aggregates and displays data from multiple sources, offering users a dynamic view of import trends, compliance rates, inspection results, and treatment facility certifications.

This new tool allows users to make more informed decisions about where they source wood packing material. It's a significant step forward in monitoring and managing wood packing material to prevent the introduction and spread of harmful pests.

Join Us for a Live Instructional Webinar

To support users in navigating the new dashboard and other knowledge-based tools, APHIS will host a live instructional webinar on:

Thursday, July 10 at 1:00 p.m. EDT

[Register](#)

During the webinar, subject matter experts will demonstrate dashboard features, review key data insights, and answer participant questions. Attendees will learn how to tailor dashboard views, interpret data visualizations, and apply the information to their operational and reporting needs.

****Licensed brokers can earn Continuing Education Credit (CEU) by attending this webinar****

For more information about the wood packing dashboard or to access the tool, please visit APHIS Wood Packing Material.
