

Smuggling Interdiction and Trade Compliance (SITC)

Report suspected smuggling: HOTLINE (800) 877-3835

Since 2001, the SITC program, part of the U.S. Department of Agriculture's (USDA) Animal and Plant Health Inspection Service, has played a major role in intercepting smuggled agricultural products before they reach U.S. markets.

Using a variety of survey, analytical, and intelligence tools, SITC works closely with the U.S. Department of Homeland Security's Customs and Border Protection at U.S. ports of entry to investigate, identify, and confiscate prohibited products before they enter the country. These efforts are critical to safeguard our country's agriculture industry from invasive pests and diseases. But we can't do it without your help!

**Don't pack it unless you can declare it.
Help stop agricultural smuggling.**
