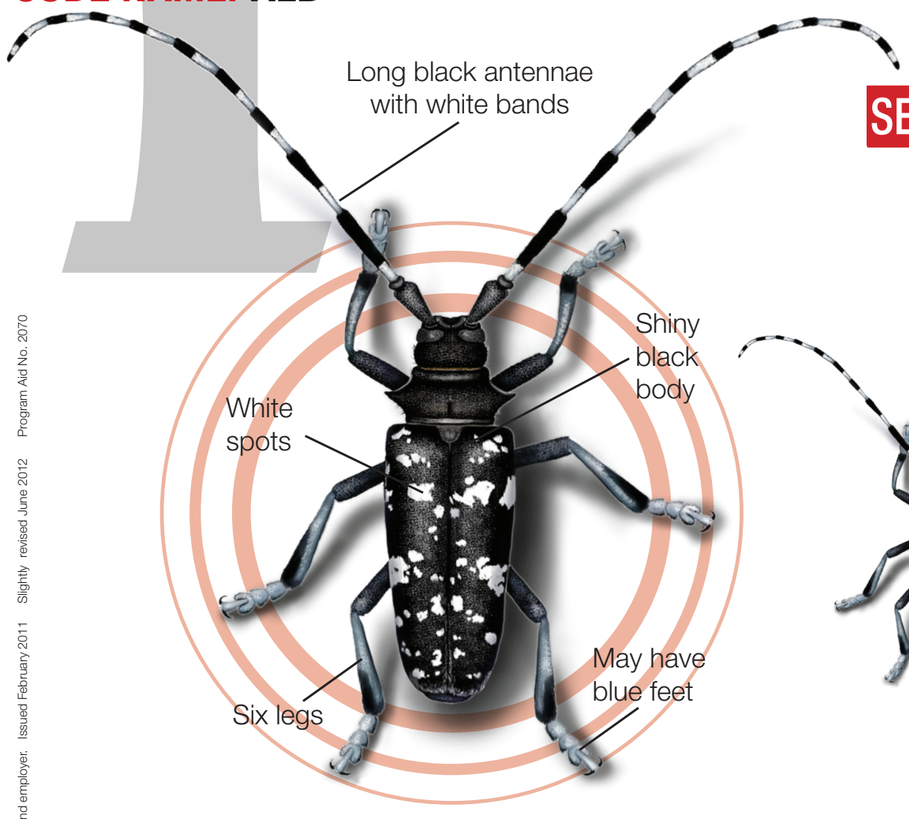
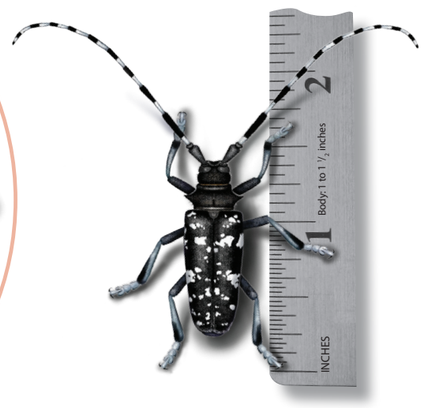
SEARCH FOR THE ASIAN LONGHORNED BEETLE

CODE NAME: ALB





Actual size

SEARCH for the **ALB** summer → fall

It's attacking our trees!

Look for the beetle on or near the trees it likes:

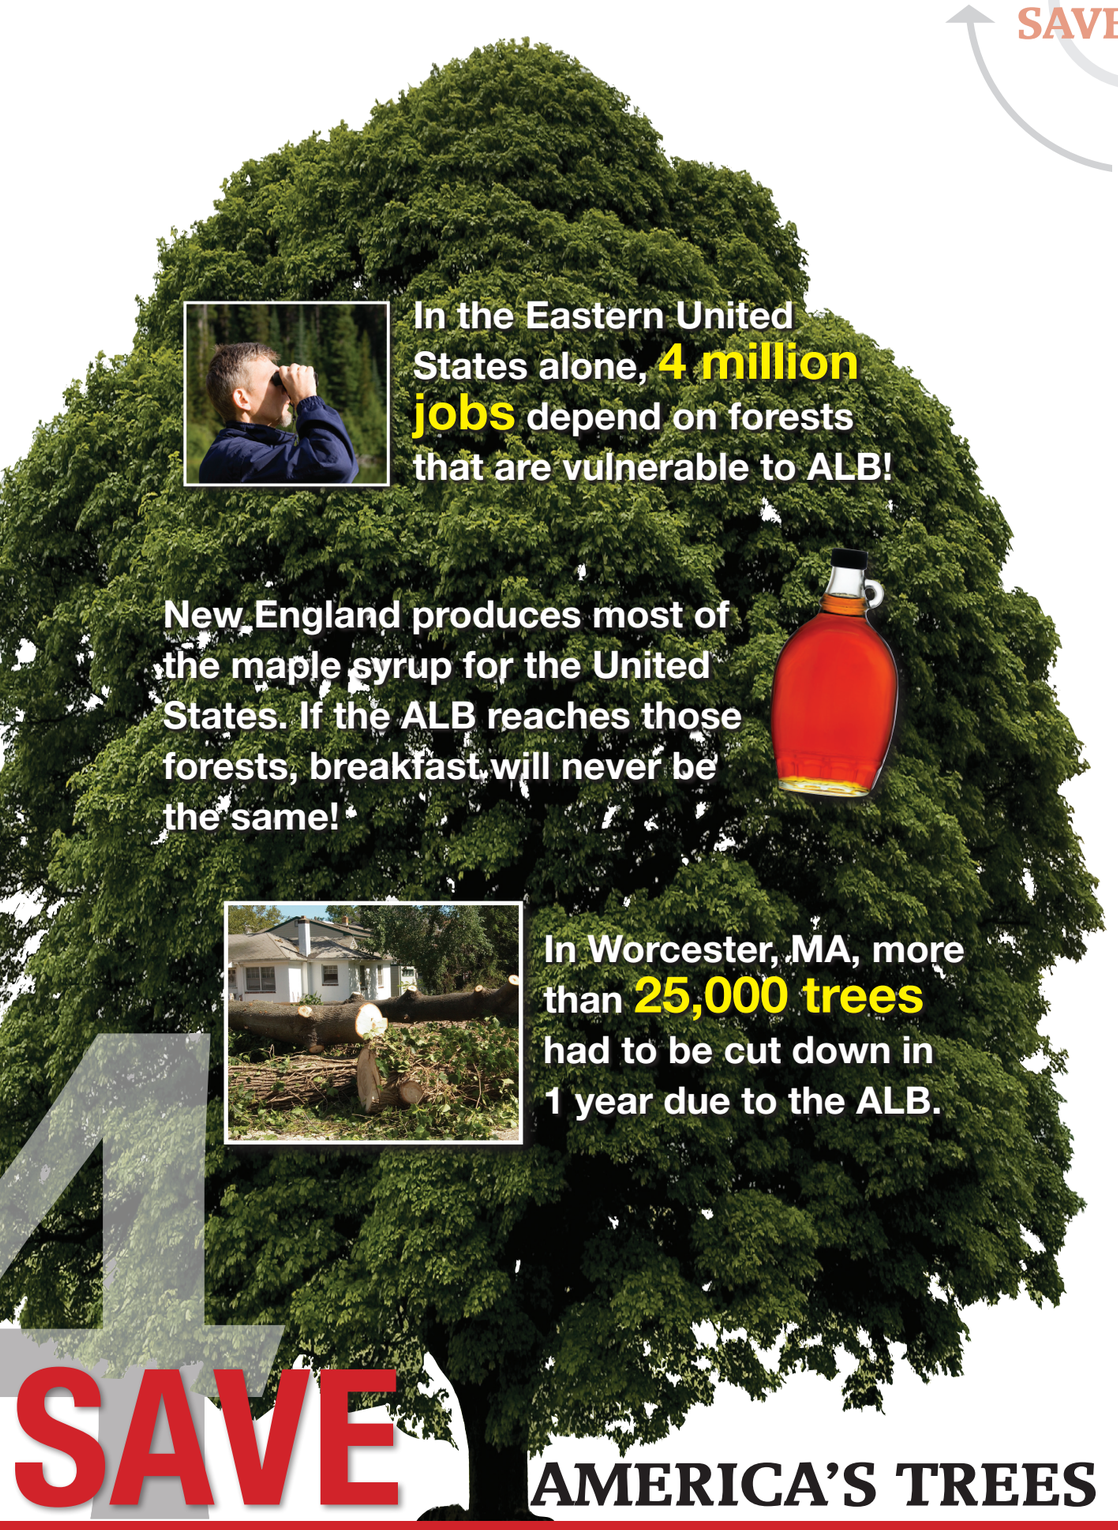
Maple

Elm

Willow

Horsechestnut

The beetle also prefers: birch, ash, London planetree, poplar, hackberry, mountain ash, mimosa, and katsura.



In the Eastern United States alone, 4 million jobs depend on forests that are vulnerable to ALB!

New England produces most of the maple syrup for the United States. If the ALB reaches those forests, breakfast will never be the same!

In Worcester, MA, more than 25,000 trees had to be cut down in 1 year due to the ALB.

4 SAVE AMERICA'S TREES

The U.S. Department of Agriculture is an equal opportunity provider and employer. Issued February 2011 Slightly revised June 2012 Program Aid No. 2070

USDA United States Department of Agriculture
Animal and Plant Health Inspection Service
