The Animal and Plant Health Inspection Service (APHIS) is responsible for ensuring that certain products are cleared to enter the United States, particularly in response to requests from countries sending products to the U.S. Department of Agriculture (USDA) through the Fruits and Vegetables Import Requirements - FAVIR website. APHIS allows the exchange of information to determine whether products that enter the U.S. are complying with the disease requirements and enable trade.

APHIS makes decisions to protect the health of U.S. agriculture and forest, and ensures the safety of imported products to prevent the introduction of plant pests and foreign animal diseases. APHIS enforces the rules of entry and conducts inspections of commodities that enter the U.S.

The information is provided at the following websites:

usda.gov/favir/ (FAVIR)

 Aphis.usda.gov (APHIS)

APHIS conducts inspections at ports of entry and issues permits to enter the U.S. to protect the health of U.S. agriculture and forest. APHIS provides information to countries sending products to the U.S. to ensure that products are accepted into the U.S.

In exporting to the U.S., a country wishing to export a commodity to the U.S. must provide information about the product to APHIS. APHIS uses this information to determine whether the product is eligible to enter the U.S. and whether it is compliant with U.S. laws and regulations. APHIS issues permits to enter the U.S. to protect the health of U.S. agriculture and forest, and to ensure that products are entered into the U.S. in compliance with U.S. laws and regulations.
