

Baggage Inspection Required for Travelers Going From Puerto Rico to the U.S. Mainland

USDA's Animal and Plant Health Inspection Service (APHIS) prohibits or restricts the movement of many agricultural products from Puerto Rico to the U.S. mainland. These products include pork and pork products, most fresh fruits and vegetables, and certain types of plants and flowers. That's because these items could harbor a dangerous stowaway—an invasive pest or disease. Just one piece of fruit or a single plant that is carrying an invasive pest or disease could cause millions of dollars in damage, expensive eradication efforts, and lost trade revenue.

To prevent the spread of invasive pests and diseases, APHIS inspects all passenger bags moving from

Puerto Rico to the U.S. mainland at the airport prior to your departure. Please be prepared to open and close your own bags. If you have any fresh fruits or vegetables, plants, flowers, souvenirs made from plants or wood, or other agricultural products with you, please tell the inspector. Failure to declare these items can result in delays and possible issuance of civil penalties ranging from \$100 to \$1,000 per violation. In addition, if you wish to ship or mail agricultural items that are allowed into the U.S. mainland, they must be inspected and/or certified by APHIS before you take them to an airline cargo office, the post office, or other courier service.

Agricultural Items From Puerto Rico Allowed into the U.S. Mainland After Inspection

- *Allium* spp. (includes onion, garlic, and chives)
- Amaranth, *Amaranthus* spp. (leaf, stem)
- Anise
