Certification Statements:

1. The animal(s) being presented for importation or the donor animal(s) of the germplasm or products presented for importation were continually resident in the country or zone of origin either for:
 1. a minimum of sixty (60) days immediately preceding export. Please note that any required pre-export quarantine period is in addition to the 60 days of residency
OR
 2. have been resident since birth or hatching.

2. The flock of origin were not knowingly exposed to pathogenic avian influenza within the preceding sixty (60) days.
3. Neither the flock of origin, nor the birds to be exported, have been vaccinated for avian influenza.
4. The flock of origin were not knowingly exposed to Newcastle disease for the sixty (60) days immediately prior to exportation.
5. Neither the flock of origin, nor the birds to be exported, have been vaccinated for Newcastle disease.
6. The flock of origin were not knowingly exposed to *Salmonella Pullorum* (pullorum disease) and *Salmonella Gallinarum* (fowl typhoid) within the preceding sixty (60) days.
7. The animal(s) being presented for importation are certified as inspected by an inspector designated for such purposes by the central veterinary service of the country of origin during the thirty (30) day period immediately preceding export to Canada and to have been found healthy and free from any clinical evidence of infectious disease and, as far as can be determined, exposure thereto. The date of the examination is _____. The owner was instructed to report any suspected illness or death affecting any animal in the herd or flock of origin, between the date of the examination and the date of the shipment.
8. Animals covered by this certificate do not originate from flocks nor had contact with any birds or poultry originating in a control zone established by state/provincial/Federal animal health authorities due to outbreaks of Newcastle disease or Highly Pathogenic Avian Influenza (HPAI).
