**Certification Statements:**

**Check box next to applicable commodity.**

**Hatching Eggs or Day-Old Poultry:**

1. The flock or flocks and the hatchery or hatcheries from which the above-described hatching eggs or day-old chicks originated were inspected by me or another accredited veterinarian within 30 days prior to shipment of above hatching eggs or setting of eggs for above shipment of day-old chicks and found free from evidence of communicable diseases and insofar as can be determined have not been exposed to Newcastle disease, fowl plague, fowl typhoid, ornithosis, and pullorum disease.
2. During the usual routine inspection of the flock or flocks there was no visible evidence of communicable diseases observed on the following inspection dates: \_\_\_\_\_
3. The hatching eggs or day-old chicks were derived from parent flocks which had been kept for at least 21 days prior to export in counties free from highly pathogenic avian influenza (HPAI) and Newcastle disease (as defined by the Terrestrial Animal Health Code of the OIE) in commercial flocks.
4. The USDA accredited veterinarian has been advised that the hatching eggs must be sanitized and that the shipment must be made in new, clean containers.
5. The hatching eggs or day-old chicks were derived from parent flocks which participate in and comply with the biosecurity standards of the National Poultry Improvement Plan (NPIP).
6. The hatching eggs or day-old chicks were derived from parent flocks which are classified under the NPIP program as pullorum-typhoid clean and Mycoplasma gallisepticum clean.
7. If the parents of the G.P. stock (day-old poultry/hatching eggs) to be imported have been vaccinated against avian influenza, the same has to be indicated along with the name of the vaccine, manufacturer, date of manufacture, and the date of vaccination.
8. For day-old chickens only: The day-old chicks have been vaccinated against avian infectious bronchitis. The nature of the vaccine used and the date of vaccination is attached to this certificate;\*  
  
OR  
  
The day-old chicks have not been vaccinated against avian infectious bronchitis.\*
9. For day-old chickens only: The day-old chicks have been vaccinated against avian infectious laryngotracheitis. The nature of the vaccine used and the date of vaccination is attached to this certificate;\*  
  
OR  
  
The day-old chicks have not been vaccinated against avian infectious laryngotracheitis.\*
10. For chicken hatching eggs or day-old chickens only: The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious bronchitis is practiced;\*  
  
OR  
  
The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious bronchitis is not practiced.\*
11. For chicken hatching eggs or day-old chickens only: The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious laryngotracheitis is practiced;\*  
  
OR  
  
The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious laryngotracheitis is not practiced.\*

**Live Poultry (other than hatching eggs or day-old poultry):**

1. On this date all poultry described above, including all other poultry maintained in the flock, were inspected by me on the premises of origin within the past 30 days and found free from evidence of infectious and contagious diseases and insofar as can be determined have not been exposed to Newcastle disease, fowl plague, fowl typhoid, ornithosis and pullorum disease.
2. The poultry were kept for at least 21 days prior to export, or since hatching, in counties free from highly pathogenic avian influenza (HPAI) and Newcastle disease (as defined by the Terrestrial Animal Health Code of the OIE) in commercial flocks.

**Veterinary Health Certificate for Export of Live Poultry, Day-Old Poultry, or Hatching Eggs from the United States of America to India**

**Veterinary Authority**  
UNITED STATES DEPARTMENT OF AGRICULTURE

**Date Of Issue**

**Certificate Number**

**Certification Statements (continued):**

3. The USDA accredited veterinarian has been advised that shipment must be made in new containers or clean containers which have been properly cleaned and disinfected.
4. The poultry originate from flocks which participate in and comply with the biosecurity standards of the National Poultry Improvement Plan (NPIP).
5. The poultry originate from flocks which are classified under the NPIP program as pullorum-typhoid clean and Mycoplasma gallisepticum clean.

\*Delete as appropriate.
