

Health certificate for goldfish (*Carassius auratus*) exported to Australia

I, the undersigned, certify that:

1. The *Carassius auratus* (goldfish) in the consignment have been inspected within seven (7) days prior to export and show no clinical signs of infectious disease or pests.
2. The export premise is currently approved for export to Australia as meeting standards under the Department of Agriculture, Fisheries and Forestry (DAFF).
3. All fish being held at the export premises exhibit no clinical signs of infectious disease or pests and are sourced from populations not associated with any significant disease or pests within the 6 months prior to certification.

DAFF Import Permit Number: _____

Number (tails) fish: _____

4. All fish in the consignment have been in premises approved for export of freshwater finfish to Australia for the 14 days prior to export.
5. The fish have not been kept in water in common with farmed food fish (fish farmed for human consumption including recreational fishing) or koi carp.
6. Adequate quarantine safeguards are in place to maintain the health status of the certified fish until export. Fish are effectively isolated in holding systems that prevent infection by direct contact with other fish or indirect contact via water, equipment or any other means.
7. The goldfish originate from a country, zone or export premises (the population) determined to be free from spring viraemia of carp virus (SVCV) and *Aeromonas salmonicida* (other than goldfish ulcer disease strains) based on a program of monitoring and surveillance acceptable to the Competent Authority and consistent with criteria for health certification stated in the DAFF import conditions *Criteria on which additional health certification for goldfish is based*.
8. If any of the fish have been imported, the country/ies of origin is/are _____, and (an) endorsed copy/ies of the health certificate/s (issued by the country/ies from where the fish originate) is/are attached, attesting that the country zone or export premises from which the fish originate is free from spring viraemia of carp virus (SVCV) and *Aeromonas salmonicida* (other than goldfish ulcer disease strains).
9. All goldfish in the consignment have been effectively treated to eliminate infestation by the gill flukes *Dactylogyrus vastator* and *D. extensus* within seven (7) days prior to export by bathing in parasiticide, being _____.
