Certification Statements :

I, the undersigned USDA Accredited Veterinarian, certify that:

- 2.1. The United States of America (US) is free of: foot-and-mouth disease, contagious bovine pleuropneumonia and rinderpest.
- 2.2. The semen used to produce the embryos met the disease control requirements of the Republic of Azerbaijan import requirements for bovine semen **OR** met the Certified Semen Services Minimum Requirements for Disease Control of Semen Produced for Artificial Insemination **OR** equivalent.
- 2.3. The embryo donors:
 - 2.3.1. were continuously resident on farms (hereafter called "premises of origin") for at least 60 days prior to embryo collection;
 - 2.3.2. had no contact with animals from outside the United States for the last 6 months;
 - 2.3.3. were kept under supervision of a USDA Accredited Veterinarian for at least 60 days before collecting the embryos, and for at least 30 days after collecting the embryos, were subject to regular clinical examinations, and were found to be free from clinical signs of contagious disease;
 - 2.3.4. were inspected on the day of collection and found to be healthy and free of clinical signs of infectious disease;
 - 2.3.5. were tested for bovine tuberculosis and persistent infection with bovine viral diarrhea virus, with negative results, indicating below the date of sampling and nature of the analysis. One negative test before the embryos are exported is sufficient.
 - 2.3.5.1. bovine viral diarrhea _____
 - 2.3.5.2. bovine tuberculosis _____
 - 2.3.6. Embryo donors used for natural mating are to be tested for bovine genital campylobacteriosis, chlamydiosis and bovine genital trichomoniasis using a laboratory acceptable to the USDA.
- 2.4. The premises of origin of the donor animal:
 - 2.4.1. have had no clinical cases of bluetongue, bovine genital campylobacteriosis, bovine viral diarrhea, enzootic bovine leukosis, infectious bovine rhinotracheitis, leptospirosis, paratuberculosis (Johne's disease), trichomoniasis, bovine tuberculosis or vesicular stomatitis for the 12 months prior to embryo collection,
 - 2.4.2. have had no clinical evidence of anthrax for the last 20 days,
 - 2.4.3. are not under official quarantine for the control of contagious animal diseases.
- 2.5. The embryos to be exported were collected, processed and stored in conformance with the International Embryo Transfer Society whose standards (recognized by the OIE) prevent microbial contamination and the transmission of blue tongue, brucellosis, enzootic bovine leukosis and infectious bovine rhinotracheitis.
3. **STORING AND SHIPPING**
 - 3.1. Media, solutions and biological products used for collecting, processing, washing or storage of embryos should be free of pathogenic microorganisms.
 - 3.2. The embryos were placed in straws which were identified in accordance with the procedures of the Manual of the International Embryo Transfer Society.
 - 3.3. The shipping container is either new or has been cleaned and disinfected in a manner acceptable to USDA.
 - 3.4. An official USDA seal has been placed on the shipping container.
 - 3.5. The embryos are transported in special containers (vessels) with liquid nitrogen.
