

ADDENDUM

U.S. Origin Health Certificate for the Export of Horses from the United States to Canada

Certification Statements:

1. The animals were inspected by a veterinarian within 30 days prior to export and found to be healthy and free from evidence of communicable disease.
2. The animals were, to the best of the knowledge and belief of the issuing veterinarian, not exposed to any communicable disease within 60 days preceding the date of inspection.

EITHER: **(select only one)**

The animals have resided in the United States or Canada since birth; or,

The animals have met all of the import requirements of the United States and have resided in the United States for the past 60 days; or,

The animal has resided in the United States for less than 60 days and is accompanied by a health certificate from each country in which the horse has resided during the 60 days prior to entry into Canada

3. The animals, at the time of the inspection, were found healthy and in a physical condition fit to be transported.
4. The exporter has been advised that any deterioration in health or physical condition of the animals that may render animals unfit for transport may result in the shipment to be refused entry to Canada.
5. A negative agar-gel immunodiffusion (Coggins) test or ELISA for equine infectious anemia within six (6) months prior to exportation is required. The test selected is identified in the commodity table. (Foals up to five months of age are exempt from the EIA requirement if they are imported into Canada at the same time as their dam and must be identified on the certificate of their dam or on a separate certificate of their own.)
6. The animals have not been on premises where *T. equigenitalis* has been isolated during the 60 days immediately preceding exportation to Canada or premises currently under quarantine or investigation for CEM. The females in the shipment have not been bred naturally to, or inseminated with semen from, a stallion positive for CEM, or a stallion resident upon positive premises or under quarantine or investigation for CEM. The animals showed no clinical signs of CEM on the day of inspection.
7. Regarding Vesicular stomatitis (VS), all states in which the animal(s) have resided in the past twenty-one (21) days were free from clinical and epidemiological evidence of vesicular stomatitis during the twenty-one (21) days immediately prior to export to Canada.
8. During the previous twenty-one (21) days, the animals in this shipment: **(select only one)**
 - a. HAVE NOT been in the states of Texas or New Mexico.
 - b. HAVE been in the states of Texas or New Mexico **(If B is selected, Note 1 below applies)**

NOTE 1: Horses originating from the states of New Mexico and Texas as well as Canadian horses returning to Canada from Texas or New Mexico will be able to enter Canada with an import permit issued by CFIA and the following additional certifications:

CFIA Permit #: _____

- a. The animal(s) were inspected by a veterinarian within 15 days prior to export.
- b. The animal(s) were inspected for ticks and if necessary treated for ticks at the time of inspection.
- c. The animal(s) have not been on premises where equine piroplasmiasis (clinical or serology) has occurred during the 60 days immediately prior to export, nor has this disease occurred on any adjoining premises during the same period of time.
- d. The animal(s) have tested negative to equine piroplasmiasis using cELISA test during the 15 days prior to export.

Test date: _____

Note: Fit to be transported means that, on the day of inspection, no animal has an infirmity, illness, injury or any other condition that could be aggravated when the animal is being transported, causing the animal to suffer.

Note: All line-outs must be initialed
