## SECTION 5 - HEALTH INFORMATION

I, the undersigned, declare and certify that the live aquatic animals described **above and intended for aquarium private, aquarium commercial, outdoor holding unit private, and/or outdoor holding unit commercial, satisfy the following requirements:**

### Zoosanitary Information

1. The population(s) to be exported has(have) been present on the premises for at least 7 days prior to export and not experienced any unexplained morbidity or mortality events during that time. Exports of aquatic animal populations to Canada cannot occur until the 7 day period of time is completed.
2. The aquatic animal(s) are of US origin or were legally imported and are not under any restriction by USDA-APHIS or intended for destruction or slaughter for disease control purposes.
3. To the best of my knowledge, the aquatic animals to be exported are not exposed to any other animals or water of lesser health status. Only water from this premise(s) of the same health status is used in this shipment.
4. Animals have been inspected within 7 days prior to export on the date of signature and appear to be free of the diseases in Section 4 and, to the best of my knowledge, exposure thereto.

### Packaging and Shipping Information

1. The aquatic animals must be packaged in shipping containers, holding units and/or conveyances that are either new or cleaned and disinfected.
2. The shipping containers and/or holding units must prevent release of the shipping contents (eg. Water or animals) while en route.
3. The aquatic animal(s) being presented for importation must be packaged in a manner which prevents contact or exchange of animals or water between different shipments of aquatic animals on the same conveyance.
4. The package was labeled indicating the detailed contents, including the location in which the aquatic animal(s) was born, the taxonomic name of the aquatic animal(s), whether the aquatic animal(s) was(were) wild or farmed, and the number or biomass of the aquatic animal(s) in the shipment.
