GUIDE FOR QUALIFYING COLLECTION UNITS, TREATMENT AND CONSERVATION OF BOVINE OVULES/EMBRYOS
COLOMBIAN AGRICULTURAL INSTITUTE

SUB-DIRECTORATE FOR ANIMAL PROTECTION AND REGULATION

City and Date: DAY MO YR.

CORPORATE NAME

City:
Location:
Telephone: E-mail

Is the Unit officially authorized? (Attach official authorization) Y N
Is the Unit under official supervision? Y N
How often is the official supervision conducted?
(Attach record of visits)

I. ANIMALS

Male Donor:
Is it registered with Associations? Y N
Which ones? (Attach registration for each animal)
Do these have a sanitary certificate? (Attach certificates) Y N
There exists a record on reproductive diseases carried out every 12 months for:
Leucosis Y N
(Type of test)
Brucelosis (Type of test) Y N

GUIDE FOR QUALIFYING COLLECTION UNITS, TREATMENT AND CONSERVATION OF BOVINE OVULES/EMBRYOS

Is rigorous control exercised on the entry of visitors?  Y  N
Are there exercise wheels in place for the bulls?  Y  N
Are the animals housed within specified units?  Y  N
Does the personnel working with the donor animals come in contact with other animals?  Y  N
Is there an insect and rodent control program in place?  Y  N
(Attach program)

Are post-mortem exams undertaken on donor animals?  Y  N
Is there an isolation area for sanitary control prior to entry?  Y  N

How long do the donors remain under quarantine pre and post entry?

Female Donor:
Are these registered with Associations?  Y  N
Which ones?  Y  N
(Attach registration for each animal)

Is the female examined by a veterinarian during ovulation and collection?  Y  N
(Attach certificates)

Describe the criteria for female donor selection as well as the processes for ovulation and collection.

Sanitary conditions required from the premises or herd originating from the donor.

If imported female donors are used, how long do these remain in the country and within the herd of origin before collection is carried out?
Embryo Collection Equipment

Is the team veterinarian authorized by the official veterinary service?  Y  N
(Attach certificate)

Is the technical team under supervision by the official veterinary service?  Y  N

Is there a Collection record in place? (Attach record)  Y  N

II. FACILITIES:

(Attach photographs)

Area for Semen Sample Taking

Is there a biosecurity program in place for the area?  Y  N
(Attach documentation)

Are there animal contention fetters?  Y  N
Are there sheltering barriers?  Y  N

Is there direct access to the laboratory?  Y  N
Is there access to the laboratory via a window?  Y  N

Is there a disinfection and sanitization program in place for the center? (Attach documentation)

Is there a documented equipment maintenance program in place? (Attach program)

Area Laboratory

(Attach photographs)

Is there a physical-chemical and bacteriological control program in place for the water used in the center?  Y  N
(Attach recent certificates)
GUIDE FOR QUALIFYING COLLECTION UNITS, TREATMENT AND CONSERVATION OF
BOVINE OVULES/EMBRYOS

Disposal of Carcasses and Waste

Is there a suitable place for disposing of carcasses?

(Attach photographs)

Secondary Areas (social, sanitary, dressing rooms, and recreational, others)

(Attach photographs)

Laboratory for handling ovules/embryos

(Attach photographs)

Is the laboratory permanent? Y N

Describe the technical and structural conditions.

Is the laboratory mobile? Y N

Describe the technical and structural conditions.

Is there periodic supervision conducted by the official veterinary service? How often?

Describe the techniques for collection and conservation of ovules/embryos

Describe the medical exams and treatments conducted or practiced on the ovules/embryos

Describe the conservation, quarantine, and transportation procedures for the ovules/embryos

III. EQUIPMENT

List the equipment in place.
GUIDE FOR QUALIFYING COLLECTION UNITS, TREATMENT AND CONSERVATION OF
BOVINE OVULES/EMBRYOS

Is there an equipment calibration program in place?  Y  N

Is there a history for each piece of equipment?  Y  N

(Attach documentation)

Are there procedures in place for the handling and maintenance of the equipment?  Y  N

IV.- MATERIALS

Are chemical reactants classified and stored in conformance with international norms?  Y  N

Are prepared solutions properly labeled?  Y  N

Are there documented procedures on the preparation of reactants?  Y  N

(Attach documentation)

V. PERSONNEL

Is there a training program in place?  Y  N

(Attach program)

Are written procedures in place that describe personnel functions and responsibilities?  Y  N

Are there training records in place?  Y  N

Hygiene

Are there hygiene norms in place?  Y  N

Have the personnel received hygiene training?  Y  N

Occupational Health

Is there an Occupational Health Program in place?  Y  N

Is there a secondary program on preventive medicine?  Y  N

Are there written norms on industrial security?  Y  N
Are security drills conducted?  Y  N
Are these logged?  Y  N

**Work Clothing**
Are there work uniforms for each area?  Y  N

**Security**
Are there face masks or goggles for handling liquid nitrogen?  Y  N
Are there gloves for handling frozen material?  Y  N
Are there fire extinguishers in place?  Y  N

**VI. DOCUMENTACIÓN**
Is there a manual on quality?  Y  N
Is there a manual on analytical techniques?  Y  N
Are the quality verification analyses logged?  Y  N
(Attach most recent logs)
Are there written procedures in place regarding each one of the activities related to the processing of seminal material? (Attach documentation)  Y  N
Are there records regarding the identification of each lot of seminal material, including the information written on the test tube, name and number of the bull's log, breed, date of collection, and processing, identification or center code?  Y  N
Are there genealogical records of the donor animals?  Y  N
(Attach records)
Are there records on the reproductive history of the donor animals?  Y  N
