	II.	health attestation								
	I, the undersigned official veterinarian, hereby certify that:									
	II.1.	ne animal described in Part I:								
		II.1.1.	2019/2035, not intended for slaughter in the framework of the eradication of a disease communicable to equine animals;							
		II.1.2.	has not shown signs or symptoms of diseases listed for equine animals in Commission Implementing Regulation (EU) 2018/1882 during the clinical examination carried out on							
		II.1.3.	meets the requirements attested in points II.2. to II.3. of this certificate;							
		II.1.4.	is accompanied by a written declaration, signed by the operator of the animal, which forms part of this certificate.							
	II.2.	Attestati	on on third country, territory or zone thereof and on establishment of dispatch							
		II.2.1.	1. The animal is dispatched from							
Part II: Certification		II.2.2.	In the country or territory of dispatch the following diseases are compulsorily notifiable: African horse sickness, Venezuelan equine encephalomyelitis, infection with <i>Burkholderia mallei</i> (glanders), surra (<i>Trypanosoma evansi</i>), dourine (<i>Trypanosoma equiperdum</i>), equine infectious anaemia, infection of rabies virus and anthrax.							
Part II: C		II.2.3.	The equine animal described in Part I comes from a country, territory or zone thereof in whice there has been no clinical, serological (in unvaccinated equine animals) or epidemiological evidence of African horse sickness during the 24 month period prior to the date of departure of the animal and there have been no systematic vaccinations against African horse sickness during the 12 month period prior to the date of departure.							
		II.2.4.	The equine animal described in Part I comes from an establishment situated in a country, territory or zone thereof in which							
		⁽³⁾ either	[infection with <i>Burkholderia mallei</i> (glanders) has not been reported during the 36 month period prior to the date of departure of the animal.]							
		⁽³⁾ or	[a surveillance and eradication programme for infection with <i>Burkholderia mallei</i> (glanders) recognised by the European Union ⁽²⁾ has been carried out during the 36 month period prior to the date of departure, and							
			⁽³⁾ either [infection with <i>Burkholderia mallei</i> (glanders) has not been reported in the establishment of dispatch during the 36 month period prior to the date of departure of the animal.]]							
			[infection with <i>Burkholderia mallei</i> (glanders) has been reported in the establishment during the 36 month period prior to the date of departure of the animal and following the last outbreak, the establishment has remained under movement restrictions							
			(3)either [until the remaining equine animals in the establishment have been subjected to a complement fixation test for infection with <i>Burkholderia mallei</i> (glanders) ⁽⁴⁾ , carried out, with negative results at a serum dilution of 1 in 5, on samples taken at least 6 months after the infected animals have been killed and destroyed.]]]							

 $^{(3)}or$ [for at least 30 days from the date of cleaning and disinfection of the establishment, after the last equine animal on the establishment was killed and destroyed.]]] II.2.5. The equine animal described in Part I comes from an establishment situated in a country, territory or zone thereof in which (3) either [surra has not been reported during the 24 month period prior to the date of departure.] (3)or [a surveillance and eradication programme for surra recognised by the European Union⁽²⁾ has been carried out during the 24 month period prior to the date of departure of the animal, and [surra has not been reported in the establishment during the 24 month period prior to the date of departure of the animal.]] $^{(3)}or$ [surra has been reported in the establishment during the 24 month period prior to the date of departure of the animal, and following the last outbreak the establishment has remained under movement restrictions (3) either [until the remaining animals in the establishment have been subjected to an enzyme-linked immunosorbent assay (ELISA) for trypanosomosis or card agglutination test for trypanosomosis (CATT) at a serum dilution of 1 in 4⁽⁴⁾ carried out, with negative results, on samples taken at least 6 months after the last infected animal has been removed from the establishment.]]] (3)or [for at least 30 days from the date of cleaning and disinfection of the establishment, after the last animal of listed species on the establishment was either killed and destroyed or slaughtered.]]] The equine animal described in Part I comes from an establishment situated in a country, territory II.2.6. or zone thereof in which (3) either [dourine has not been reported during the 24 month period prior to the date of departure of the (3)or [a surveillance and eradication programme for dourine recognised by the European Union⁽²⁾ has been carried out during the 24 month period prior to the date of departure of the animal, and ⁽³⁾either [dourine has not been reported in the establishment during the 24 month period prior to the date of departure of the animal.]] (3)or [dourine has been reported in the establishment during the 24 month period prior to the date of departure of the animal, and following the last outbreak, the establishment has remained under movement restrictions (3) either [until the remaining equine animals in the establishment, except castrated male equine animals, have been subjected to a complement fixation test for dourine, carried out with negative results at a serum dilution of 1 in 5⁽⁴⁾ on samples taken at least 6 months after the infected animals have been killed and destroyed or slaughtered, or the infected entire male equine animals have been castrated.]]] (3)or [for at least 30 days following cleaning and disinfection of the establishment, after the last equine animal on the establishment was either killed and destroyed or slaughtered.]]] II.2.7. The equine animal described in Part I has not been vaccinated against Venezuelan equine encephalomyelitis during the 60 day period prior to the date of its departure, and (3) either [it comes from an establishment situated in a country or territory in which Venezuelan equine

encephalomyelitis has not been reported during the 24 month period prior to the date of its

[it comes from an establishment in which Venezuelan equine encephalomyelitis has not been reported during the 6 month period prior to the date of its departure and which is situated in a country, territory or zone thereof in which a surveillance and eradication programme for Venezuelan equine encephalomyelitis recognised by the European Union⁽²⁾ has been carried out

departure.]

(3)or

during the 24 month period prior to the date of its departure.]

- II.2.8. The equine animal described in Part I comes from an establishment in which
- (3) either [equine infectious anaemia has not been reported during the 12 month period prior to the date of departure of the animal.]
- (3) or [equine infectious anaemia has been reported during the 12 month period prior to the date of departure of the animal and following the last outbreak the establishment has remained under movement restrictions
 - (3) either [until the remaining equine animals in the establishment have been subjected to an agar gel immuno-diffusion test (AGID or Coggins test) or ELISA⁽⁴⁾ for equine infectious anaemia carried out, with negative results, on samples taken on two occasions with a minimum interval of 90 days following cleaning and disinfection after the infected animals have been killed and destroyed or slaughtered.]]
 - [for at least 30 days from the date of cleaning and disinfection of the establishment, after the last equine animal on the establishment was either killed and destroyed or slaughtered.]]
- II.2.9. The equine animal described in Part I comes from an establishment in which
 - II.2.9.1. infection with rabies virus in kept terrestrial animals has not been reported during the 30 day period prior to the date of departure of the animal;
 - II.2.9.2. anthrax in ungulates has not been reported during the 15 day period prior to the date of departure of the animal.
- II.2.10. To the best of my knowledge and as declared by the operator, the equine animal described in Part I has not been in contact with kept animals of listed species which did not comply with the requirements referred to in points II.2.3. to II.2.9.1 during the 30 day period prior to the date of departure of the animal, and with the requirement referred to in point II.2.9.2. during the 15 day period prior to the date of departure of the animal.
- II.3. Attestation of residence and pre-export isolation

 - II.3.2. the animal exited from the European Union
 - (3)either [less than 30 days ago, and since exit from the European Union was never in a country territory or zone thereof (1) other than those of the same Sanitary Group as the country, territory or zone thereof of dispatch, and resident in establishments under veterinary supervision, accommodated in separated stables without coming into contact with equine animals of lower health status except during competition and has taken part in or was stabled together with horses participating in the LG Global Champions Tour

(3)either [in the Metropolitan area of Mexico City, Mexico;]

(3) and/or [in Miami, Unites States of America;]

(3) or [in Shanghai, China;]]

Notes:

In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland / Northern Ireland in conjunction with Annex 2 to that Protocol, references to European Union in this certificate include the United Kingdom in respect of Northern Ireland.

This animal health certificate shall be completed according to the notes for the completion of certificates provided for in Chapter 4 of Annex I to Commission Implementing Regulation (EU) 2020/2235.

Part I:

Box reference I.8: Provide the code of the country, territory or zone thereof of dispatch as appearing

in column 2 of Annex IV to Commission Implementing Regulation (EU) 2021/404.

Box reference I.27: "Identification system": The animal must be individually identified with one of the

means of identification defined in point (a), (c), (e), or (g) of Annex III to Delegated Regulation (EU) 2019/2035, or be identified by an alternative method in accordance with Article 62 of that Regulation (e.g. brand) provided it is recorded in its identification document (passport). Specify the identification system and the anatomic place used on the animal. The number of the accompanying passport or the Unique Code, if no passport number is available, should be stated and the name of the competent authority

which validated it.

"Age": Date of birth (dd/mm/yyyy).

"Sex": (M = male, F = female, C = castrated.

Part II:

The certificate must be issued within the 48 hour period prior to loading or on the last working day before loading of the animal for dispatch to the Member State of destination in the Union.

The entry into the Union shall not be allowed when the animal was loaded either prior to the date of authorisation for entry into the Union from the respective country, territory or zone thereof referred to in point II.1.1., or during a period where restrictive measures have been adopted by the Union against the entry of equine animals from this country, territory or zone thereof. Check against columns 8 and 9 of Part 1 of Annex IV to Implementing Regulation (EU) 2021/404.
