**Model Veterinary Health Certificate to accompany SPF Hatching Eggs
Exported from _____ into Israel.**

I, the undersigned Official Veterinarian hereby certify that:

1. The SPF hatching eggs _____, covered hereunder originate from healthy flocks
(Number)
which have been clinically, bacteriologically and serologically examined and were found free from the following diseases: Newcastle Disease, Avian influenza, Adenoviruses, Infectious bronchitis, Laryngotracheitis, Mycoplasmosis, Reticuloendotheliosis, Reovirus, Salmonella *pullorum*, *gallinarum*, *enteritidis* and *typhimurium*, Infectious bursal disease (I.B.D.), Marek's disease, Infectious viral encephalitis (chickens) Fowl pox, Lymphoid leukosis (including subtype "J").

State dates and tests performed for each of the abovementioned diseases (incl. other diseases tested).

2. A pullorum-gallinarum agglutination test has been carried out on the parent flock two times for 5% of the birds (max. 200 samples each) before the start of production and is carried out on 1.25% (max. 50 samples) of the flock in each week during production. The entire farm and all parent flocks have been tested with negative results within 12 months prior to the date of export.
3. Each egg has to carry the producer's stamp attesting that it is an SPF hatching egg.
