## Veterinary Health Certificate for the Export of Equine Semen from the United States of America (US) to the Kingdom of Saudi Arabia

## I. Identification:

Name of donor stallion	Breed	No. of container	Date of collection	No. of straws

II.	Origin	and	place	of	birth:

Date of entry (approval) into artificial insemination center (A.I.C.):

Name and address of A.I.C.:

- III. Name and address of consignee:
- IV. Name and address of exporter:
- V. I, the undersigned USDA accredited veterinarian, hereby certify that:
  - A. The US is free from African horse sickness, dourine, glanders and Venezuelan equine encephalomyelitis.
  - B. The frozen semen, specified below, was derived from an A.I.C.:
    - 1. Which is under permanent veterinary supervision of a USDA accredited veterinarian;
    - 2. Where all stallions on farm of origin showed no clinical, infectious or contagious signs of the following diseases for the 60 days prior to entry to the A.I.C.
      - a) equine viral rhinopneumonitis
      - b) equine infectious anemia
      - c) equine viral arteritis
      - d) equine influenza or
      - e) rabies
      - f) West Nile virus encephalitis

Health Certificate No
(Valid only if the USDA Veterinary
Seal appears over the Certificate No.

- 3. Which, at the time of semen collection, no case of any contagious disease transmissible to equines was recorded in the A.I.C. or farm of origin of the stallion.
- C. The semen specified below was derived from a stallion:
  - 1. Which has resided in a US farm of origin at least for 60 days prior to semen collection;
  - 2. Which has been inspected, prior to semen collection, and found to be healthy and free of any communicable diseases insofar as can be determined;
  - 3. Which has passed, within 30 days prior to semen collection, a negative immunodiffusion test for equine infectious anemia (Coggins test);
  - 4. Which was serologically tested (virus neutralization), within 14 days of semen collection, for equine viral arteritis

OR

- at least 0.1 cc of each ejaculate intended for export was tested for equine viral arteritis (virus isolation) with negative results;
- 5. Which has not been used for natural breeding from the time sampling began to the date of collection of the said semen.
- D. The said semen was hygienically and safely collected, packed, sealed and clearly identified.

This Certificate is valid for 15 days
