Certification Statements:

I, the undersigned USDA accredited veterinarian, certify that the consignment described above meets the following requirements:

1. The United States is free of foot and mouth disease and contagious bovine pleuropneumonia.

2. Bluetongue:

The donor animals were kept in a vector-protected establishment for at least 60 days before commencement of, and during, collection of the semen.*

OR

The donor animals were subjected to a serological test to detect antibodies to the bluetongue virus group, with negative results, between 28 and 60 days after each collection for this consignment.*

OR

The donor animals were subjected to an agent identification test on blood samples collected at commencement and conclusion of, and at least every 7 days (virus isolation test) or at least every 28 days (PCR test) during, semen collection for this consignment, with negative results.*

OR

An aliquot of semen from each collection code intended for export was tested using PCR, with negative results.*

3. The semen was collected at a semen collection center where the following diseases were not reported for at least 6 months prior to collection of the semen: trichomoniasis, brucellosis, bovine tuberculosis, campylobacteriosis, and leptospirosis.

4. The semen was collected at a semen collection center which is approved by APHIS and is under the supervision of a USDA Accredited Veterinarian.

5. The donor animals were visually examined on the day of collection and showed no clinical signs of any contagious or infectious diseases.

6. The semen was collected in accordance with Chapter 4.6. of the OIE Terrestrial Animal Health Code (General Hygiene in Semen Collection and Processing Centers) or equivalent.

7. The donor animals were tested for the following diseases, in accordance with the Certified Semen Services (CSS) Minimum Requirements for Disease Control of Semen Produced for AI: trichomoniasis, leptospirosis, bovine tuberculosis, campylobacteriosis, and brucellosis.

**Delete as appropriate.*
