

**U.S. ORIGIN HEALTH CERTIFICATE FOR EXPORT OF
CATTLE TO THE REPUBLIC OF SUDAN
FROM THE UNITED STATES**

I. MINISTRY: United States Department of Agriculture

II. AGENCY: Animal and Plant Health Inspection Service

III. NAME AND ADDRESS OF CONSIGNOR:

IV. NAME AND ADDRESS OF CATTLE ISOLATION FACILITY:

V. NAME AND ADDRESS OF CONSIGNEE:

VI. TOTAL NUMBER OF CATTLE IN SHIPMENT:

VII. CERTIFICATION STATEMENTS:

1. The United States is free of foot and mouth disease, rinderpest, and contagious bovine pleuropneumonia.
2. The United States is recognized by the World Organization for Animal Health (OIE) as a country with negligible risk of bovine spongiform encephalopathy (BSE).
3. The herd of origin has been free of brucellosis and tuberculosis for the 12 months prior to export.
4. All cattle were isolated for at least 21 days immediately prior to export in a facility approved by, and under the oversight of, the USDA-Accredited Veterinarian.

5. Cattle were isolated on premises, and surrounding 100 km, that are free of clinical cases of vesicular stomatitis and anthrax for the last 12 months.
6. The animals were inspected within 21 days prior to export and found to be free from clinical evidence of communicable diseases.

VIII. TEST REQUIREMENTS:

The animals must be tested as prescribed below, with negative results, within 45 days prior to export (except for tuberculosis, which may be conducted within 60 days prior to export).

** Mark through any statement or testing option not applicable. **

1. Tuberculosis: Intradermal test using bovine PPD tuberculin.

 Test date(s) _____
2. Brucellosis: Complement fixation test at a 1:10 dilution **OR** buffered
 Brucella antigen test (e.g., card test) **OR** ELISA or standard
 tube **OR** plate agglutination test at a 1:50 dilution.

 Test date(s) _____
3. Enzootic Bovine Leukosis (EBL) : ELISA tests **OR** Agar-gel
 immunodiffusion (AGID) tests

 Test date(s) _____
4. Bluetongue: ELISA **OR** AGID **OR** SNT **OR** CFT at 1:5 **OR**
 PCR (pooling up to 5 samples)

 Test date(s) _____
5. ¹⁻² Campylobacteriosis: Culture of preputial **OR** vagina specimen.
6. ¹⁻² Trichomoniasis: Culture of preputial **OR** vaginal specimen with microscopic
 examination.

¹Required only of breeding animals;

²Required only of bulls that have been used for natural service, and heifers and cows that have been bred through natural mating. For those animals to which the requirement does not apply, a statement that the animals have not been used for natural service (bulls) or bred through natural mating (heifers and cows) must be included on the health certificate.

Health Certificate No. _____
(Valid only if the USDA Veterinary
Seal appears over the Certificate No.)

IX. OTHER INFORMATION:

The animals were inspected and treated for internal and external parasites on _____ (date) with _____ (name of the product) within 21 days prior to export.

Within 30 days prior to export, the animals were vaccinated for the following diseases:
NOTE: IBR, BVD and Para-influenza may be either a killed **or** inactive vaccine.

Disease	Vaccination date
IBR	_____
BVD	_____
Para-influenza	_____
Clostridial diseases	_____
Leptospirosis	_____

The animals will have a clinical veterinary inspection at the port of embarkation within 48 hours of exportation by a USDA Federal Veterinarian, and only those found free of evidence of communicable disease will be permitted for export.
