IMPORT HEALTH REQUIREMENTS OF URUGUAY FOR FROZEN BOVINE SEMEN FROM THE UNITED STATES OF AMERICA

The semen must be accompanied by a U.S. Origin Health Certificate issued by a veterinarian authorized by the U.S. Department of Agriculture (USDA) and endorsed by a Veterinary Services (VS) veterinarian. The certificate shall contain the name and address of both the consignor and consignee and complete identification of the semen to be exported. Additional information shall include:

CERTIFICATION STATEMENTS

1. The United States is free of foot-and-mouth disease.

2. The bulls of the resident herd at the center are not used for natural service nor were they used for natural service during the isolation period.

3. The semen for this shipment was collected from clinically healthy bulls. At least 30 days have elapsed since collecting the semen and no evidence of clinical disease has been noted in the donor bulls.

4. During the 2 years preceding the collection of semen for export, there has been no evidence of clinical infectious bovine rhinotracheitis (IBR) at the center.

5. No clinical cases of bovine viral diarrhea (BVD) have been observed at the center during the 12 months preceding the collection of the semen for this export.

6. The method of semen collection and processing, minimum sperm count/unit and the type and concentration of antibiotics used must be stated on the certificate.

7. The artificial insemination center is a participant in good standing of the Certified Semen Services (CSS) or equivalent, and is under the direct supervision of a USDA-accredited veterinarian.

8. BSE:
   a) The donor is clinically free of BSE.
   b) No descendant of the donor has been found (or reported) to be infected with BSE.
   c) The parents of the donor have not been found (or reported) to be infected with BSE.
   d) During the previous 5 years the donor has not been on premises with cases of BSE.
   e) Feeding of ruminant origin meat-and-bone meal and greaves to ruminant animals is prohibited in the United States as of August 4, 1997, and this prohibition is effectively enforced.

9. United States has never reported a case of Schmallenberg disease/ Estados Unidos nunca ha reportado un caso de la enfermedad de Schmallenberg.

TEST REQUIREMENTS

Every 6 months the donor bulls are tested with negative results to the following diseases. Note that PCR and Virus Isolation tests require to be done on the date of semen collection:

1. Tuberculosis: intradermal caudal fold test using mammalian PPD tuberculin

2. Brucellosis: standard tube test (STT) or standard plate test (SPT), at the 1:50 dilution (30IU/ml), OR particle complement fluorescent immunoassay (PCFIA) test
3. Trichomoniasis: culture of preputial washings

4. Campylobacteriosis: culture of preputial washings, or fluorescent antibody test

5. Enzootic Bovine Leukosis (EBL): agar-gel immunodiffusion (AGID), or ELISA test or PCR on semen on the date of semen collection.

6. Paratuberculosis: Complement fixation (CF) test, OR ELISA test, OR fecal culture (fecal culture can be done every 12 months)

7. Leptospirosis: Microtiter agglutination test at the 1:400 dilution for serotypes canicola, grippotyphosa, hardjo, Pomona and icterohaemorrhagiae.

8. IBR: Serum neutralization (SN) test at 1:8 dilution*; OR, ELISA at 1:2 dilution*; OR, PCR on semen. *Seropositive animals may be subjected a PCR test of semen to qualify for export.

9. Bluetongue: AGID test, OR ELISA test, or PCR on semen on the date of semen collection.

NOTE: The pre-collection test results and (if available, and depending on the testing schedule), post-collection test results must be noted on the health certificate.

10. Vesicular stomatitis: Serum neutralization (SN) test at a 1:32 dilution OR CF OR ELISA Estomatitis Vesicular: Prueba de seroneutralizacion (SN) a una dilucion de 1:32 OR CF OR ELISA
GENERAL REQUIREMENTS

1. Prior to being admitted into the center (becoming residents of the herd), the donor bulls must be isolated for a period of no less than 60 days during which time they must be tested, with negative results, for the following diseases:

   a. Tuberculosis: Intradermal caudal fold test using mammalian ppd tuberculin
   b. Brucellosis: SPT on STT at 1:50 (30IU/ml)
   c. Bluetongue: AGID, OR ELISA OR PCR on the date of collection
   d. Bovine leukemia: AGID, OR ELISA OR PCR on the date of collection
   e. Leptospirosis: Microtiter agglutination test - no greater than 1:400
   f. Paratuberculosis: fecal culture, OR ELISA, OR CF test.
   g. Trichomoniasis: Culture of the preputial smegma from at least five (5) samples collected at 7-day intervals. Note: animals less than 12 months old need only be tested three times at 7-day intervals.
   h. Campylobacteriosis: Culture of the preputial smegma, OR fluorescent antibody test from at least five (5) samples collected at 7-day intervals. Note: animals less than 12 months old need only be tested three times at 7-day intervals.

2. All bovines in the center must be under continuous veterinary supervision.

3. All bovines in the center must be housed in facilities that are separate from other farms and buildings having livestock which are not part of the center.

4. Every 6 months all donor bulls must be tested with negative results to the following diseases: brucellosis, tuberculosis, bluetongue, trichomoniasis, campylobacteriosis, leptospirosis, and enzootic bovine leukemia.

5. Every 12 months all donor bulls must be tested with negative results for paratuberculosis.

OTHER INFORMATION

The government of Uruguay requests an additional declaration for semen from Holstein donor bulls, which we recommend be separate from the health certificate as follows: “The donor bulls were tested and found to be negative to BLAD and CMV. No genetic anomalies derived from recessive genes were detected.”

NOTE:
The attached health certificate may be used for exporting bovine semen to Uruguay.
### INTERNATIONAL HEALTH CERTIFICATE FOR FROZEN BOVINE SEMEN EXPORTED FROM THE UNITED STATES OF AMERICA TO URUGUAY

**CERTIFICADO ZOOSANITARIO INTERNACIONAL PARA SEMEN BOVINO CONGELADO EXPORTADOD DESDE LOS ESTADOS UNIDOS DE AMERICA A URUGUAY**

#### Part A: IDENTIFICATION

**IDENTIFICACION**

1. Species and Commodity: **BOVINE SEMEN**
2. Exporting Country: **UNITED STATES OF AMERICA**
3. Country of destination: **URUGUAY**
4. Issuing Authority: **UNITED STATES DEPARTMENT OF AGRICULTURE**
5. Donor Identification:

Donor bull identification:

**Identificación del toro donante:**

Name/Nombre __________________________

Identification/Identificación ________________________

TESTING (PRUEBAS)

The donor bulls were negative to the following tests within 6 months prior to semen collection. PCR and Virus Isolation tests require to be done on the date of semen collection:

*Los toros donantes tuvieron resultados negativos a las siguientes pruebas dentro de los seis meses anteriores a la colección del semen. Las pruebas de PCR y aislamiento viral requieren ser efectuadas el dia de la colecta de semen:*

**cultivo fecal**
7. Leptospirosis: Microtiter agglutination test at the 1:400 dilution for serotypes canicola, grippotyphosa, hardjo, Pomona and icterohaemorrhagiae.  
*Prueba de aglutinación de microtítulo, a una dilución de 1:400 para los serotipos L. canicola, L. grippotyfosa, L. hardjo, L. pomona, y L. icterohaemmorragica*

8. Infectious Bovine Rhinotracheitis-IBR:  
   Serum Neutralization (SN) test at 1:8 dilution; OR  
   ELISA test at 1:2 dilution; OR  
   PCR on semen.  
   (list test type and date)

   *Rinotraqueitis Infecciosa:  
   Prueba de Seroneutralización a dilución 1:8; O  
   Prueba de ELISA a dilición 1:2; O  
   PCR en semen.*

9. Enzootic bovine leukosis: agar-gel immunodiffusion (AGID), or ELISA test, or PCR on semen on the date of semen collection  
   *Leucosis Enzootica Bovina (LEB): Inmunodifusion en agar gel (AGID), o ELISA, ó  
   PCR en semen en la fecha de colecta del semen*

10. Vesicular stomatitis: Serum neutralization (SN) test at a 1:32 dilution OR CF  
    OR ELISA  
    *Estomatitis Vesicular: Prueba de seroneutralización (SN) a una dilución de 1:32 OR CF OR ELISA*

**CERTIFICATION STATEMENTS / CERTIFICACIONES**

1. The United States is free of foot-and-mouth disease.  
   *Los Estados Unidos es país libre de fiebre aftosa.*

2. The bulls of the resident herd at the center are not used for natural service nor were they used for natural service during the isolation period.  
   *Los toros residentes del centro no son, ni han sido, usados para monta natural durante el periodo de aislamiento.*

3. The semen for this shipment was collected from clinically healthy bulls. At least 30 days have elapsed since collecting the semen and no evidence of clinical disease has been noted in the donor bulls.  
   *El semen de esta embarcación fue recolectado de toros clínicamente sanos. Estos toros han pasado por lo menos 30 días desde que el semen fue recolectado sin mostrar ningún síntoma de enfermedad.*
4. During the 2 years preceding the collection of semen for export, there has been no evidence of clinical infectious bovine rhinotracheitis (IBR) at the center.

_Durante los dos años anteriores a la recolección del semen para exportación, no hubo evidencia de infección clínica de rinotraqueitis bovina en el centro._

5. No clinical cases of bovine viral diarrhea (BVD) have been observed at the center during the 12 months preceding the collection of the semen for this export.

_Durante los doce (12) meses anteriores a al recolección del semen para esta exportación, no se han observado casos clínicos de diarrea viral bovina en el centro._

6. The method of collection and processing:

_Método de recolección y procesamiento:_

Minimum sperm count/unit:

Número mínimo de esperma por unidad:

7. The artificial insemination center is a participant in good standing of the Certified Semen Services (CSS) or equivalent, and is under the direct supervision of a USDA-accredited veterinarian.

_El centro es participante de los Servicios de Semen Certificados ó equivalente, y está bajo la supervisión directo de un veterinario acreditado del USDA._

8. Regarding bovine spongiform encephalopathy (BSE/EEB):

_Con respecto a la encefalopatía espongiforme bovina (EEB):_

a) The donor is clinically free of BSE.

_El donante no se encuentre afectado clínicamente de EEB._

b) No descendant of the donor has been reported to be infected with BSE.

_Ninguna descendencia del donante haya sido reportada como afectada de EEB._

c) The parents of the donor have not been found (or reported) to be infected with BSE.

_Los padres del donante no han sido reportados como afectados de EEB._

d) During the previous 5 years the donor has not been on premises with cases of BSE. _Durante los 5 años previos el donante no ha permanecido en predios que hubieran tenido casos de EEB._

e) Feeding of ruminant origin meat-and-bone meal and greaves to ruminant animals is prohibited in the United States as of August 4, 1997, and this prohibition is effectively enforced.

_En los Estados Unidos se prohíbe alimentar a los animales ruminate con harinas de carne y hueso y chicharrones de origen rumiante desde el 4 de agosto de 1997. Esta prohibición se cumple efectivamente._

9. United States has never reported a case of Schmallenberg disease/ _Estados Unidos nunca ha reportado un caso de la enfermedad de Schmallenberg._
